Dear Researcher/Author:

April 7, 2008 is the implementation date for the new NIH Public Access Policy [http://publicaccess.nih.gov/](http://publicaccess.nih.gov/). Any article resulting from your NIH-funded research that is accepted for publication on or after April 7, must be submitted to PubMed Central (PMC). You will find more information on the policy and supporting documentation on the Library's website: [http://library2.med.cornell.edu/FacPub/nihpolicy.html](http://library2.med.cornell.edu/FacPub/nihpolicy.html)

As the author, it is your responsibility to ensure that you have the right to deposit your manuscript with PMC. Because some publishers require that you transfer copyrights to them prior to acceptance of publication, you may already have relinquished copyright to the publisher. If you are notified on or after April 7 that a publication has been accepted, your first step must be to secure permission from the publisher. Here are three possible approaches:

1. Check the list of PMC journals [http://publicaccess.nih.gov/submit_process_journals.htm](http://publicaccess.nih.gov/submit_process_journals.htm). If your journal is among these, it means that the publisher has already agreed to submit the final published article directly to PMC. In this case you need only request to be informed when submission is complete so that you can retrieve the PMCID number for use on subsequent NIH applications and reports.

2. Some publishers will send a copy of your manuscript to PMC upon your request:

   Elsevier [http://www.elsevier.com/wps/find/authorsview.authors/nihauthorrequest](http://www.elsevier.com/wps/find/authorsview.authors/nihauthorrequest)

Note: If the publisher deposits only your manuscript, rather than the final published version of the article, you will still have to sign onto the NIH Manuscript Submission system [http://www.nihms.nih.gov/](http://www.nihms.nih.gov/) to review and approve release of the article to PubMed Central.
Note: Some publishers may charge a fee for submission of your manuscript to PMC which might be reimbursed by NIH funds. However, you can avoid those fees by submitting yourself (option 3, below) and Library staff will gladly provide every assistance to you or your proxy with the submission process.

3. If your journal is not in category 1 or 2, you will need to submit the accepted manuscript complete with all figures and data using the NIH Manuscript Submission System [http://www.nihms.nih.gov/]. **You will need permission from the publisher or other copyright holder.** NIH expects you to submit upon acceptance of the article for publication. NIH provides tutorials to assist you with the process [http://www.nihms.nih.gov/web-help/index.html] and the Library offers classes every day next week (April 7-11) so that you can learn more about the policy and the process. Or contact the NIH Mandate Specialists at the Weill Cornell Medical Library with your questions or to schedule an appointment: infodesk@med.cornell.edu or 212-746-6055.

When you submit a manuscript to a journal for publication, if your publisher does not participate in PMC, we recommend that you include this letter [http://library2.med.cornell.edu/FacPub/lettertopublisher.pdf]

Note: do not submit your manuscript to PMC before submitting to a prospective publisher. Some publishers in their publication agreements ask you to warrant that there are no prior agreements concerning the publication and that the publisher will own all rights. If you submit a manuscript to PMC prior to signing such an agreement, you would be in breach of the agreement and in violation of NIH policy.

Please contact the Library at 212-746-6055 or with any questions and infodesk@med.cornell.edu for more information see [http://library2.med.cornell.edu/FacPub/nihpolicy.html].
