PROVENANCE:

The papers were donated to the archives by Dr. and Mrs. Vincent du Vigneaud in July 1975.

ADMINISTRATIVE/BIOGRAPHICAL NOTE:

On May 18, 1901, Dr. Vincent du Vigneaud was born in Chicago. He was educated at the University of Illinois where he received a B.S. degree in 1923 and a M.S. degree in 1924. Upon graduation, he worked for one year as the assistant biochemist at Philadelphia General Hospital and the Graduate School of Medicine of the University of Pennsylvania. He earned a PhD degree from University of Rochester in 1927. He received further training as a National Research Council Fellow working at several institutions including Johns Hopkins University Medical School, Kaiser Wilhelm Institute in Dresden, Germany, University of Edinburgh Medical School in Scotland, and the University College Hospital Medical School in London. After his fellowship, he was on the physiological chemical staff at University of Illinois at Urbana, Illinois. In 1932, he was appointed head of the Department of Biochemistry at George Washington University School of Medicine. From 1938-1967, he was the chairman of the Department of Biochemistry at Cornell University Medical College. After his retirement in 1967, he was the professor of chemistry at Cornell University in Ithaca, NY.

Dr. du Vigneaud engaged in several landmark research studies. He first conducted research on the sulfur of insulin. In 1946, Dr. du Vigneaud and his colleagues at Cornell University Medical College were successful in isolating in crystalline form the active synthetic G. penicillin. Later he focused on the hormones oxytocin and vasopressin both produced by the posterior pituitary gland. It was his work with sulfur compounds and the first synthesis of the polypeptide hormone, oxytocin that led to his being awarded the Nobel Prize in Chemistry in 1955. This work opened new research in the field of protein organic chemistry. He collaborated with numerous graduate students and researchers in his laboratory.

Along with the Nobel Prize, he was awarded the Lasker Award from the American Public Health Association in 1948, Nichols Medal from the American Chemical Society in 1945, and numerous other awards.

He died on December 11, 1978.

SCOPE AND CONTENT NOTE:

The papers have been divided into nine series: Correspondence (1929-1975), General Correspondence (1929-1975), Requests for Samples (1952-1975), Office Materials (1934-1975), Past Personnel (1935-1975), Notebooks (1930-1975), Green Slips (unprocessed), Reprint (1927-1965), and Miscellaneous (1901-1974).

Series I: Correspondence, 1929-1975 (Boxes 1-8)

This series, arranged alphabetically, contains correspondence with colleagues and friends.

Series II: General Correspondence, 1929-1975 (Boxes 9-10)

This series, arranged alphabetically, consists of correspondence with colleagues and friends.

Series III: Requests for Samples, 1952-1975 (Boxes 11-13)

This series, arranged chronologically, includes correspondence with colleagues regarding request for samples from his research including the pituitary hormones oxytocin and vasopressin.

Series IV: Office Materials, 1934-1975 (Boxes 14-23)

This series, arranged alphabetically, contains his office files on variety of subjects including budgets, grants, and his oxytocin, penicillin, insulin, polypeptides and vitamin H studies.

Series V: Past Personnel, 1935-1975 (Boxes 24-29)

This series, arranged alphabetically, consists of files on colleagues and graduate students that worked with Dr. du Vigneaud.

Series VI: Notebooks, 1930-1975 (Boxes 30-58)

This series, arranged numerically by notebook number, consists of research notebooks of colleagues and graduate students who worked under Dr. du Vigneaud at George Washington University School of Medicine and Cornell University Medical College.

Series VII: Green Slips, unprocessed (Boxes 59-62)

This series includes green slips regarding research conducted in his laboratory.

Series VIII: Reprints, 1927-1965 (Boxes 63-64)

This series includes reprints and publications by Dr. du Vigneaud.

Series IX: Miscellaneous, 1901-1974 (Boxes 65-68)

This series, arranged alphabetically, contains a bibliography of his articles, and research and student materials.

ACCESS RESTRICTIONS:

The past personnel series may have confidential personnel information in some of the files.

RELATED MATERIAL:

Additional materials were given to the archives by the Department of Biochemistry that was from Dr. du Vigneaud. These collections include:

Graduate Student Theses, 1930-1966

Vincent du Vigneaud/Department of Biochemistry, 1938-1970 (donated in 1995)
includes correspondence, grants, elective courses, graduate students materials, summer fellowships, and student notebooks.
