**Finding Aid To
THE HAROLD WOLFF, MD (1898-1962) PAPERS**

**Dates of Papers:
1922-1970**

**159 Linear Inches
(26 Boxes)**

**Finding Aid Prepared By:
Stephen Novak
Assistant Archivist
1988**

Provenance

These papers were received by the Medical Archives on April 14, 1981 from Dr. Eric T. Carlson of the Department of Psychiatry of The New York Hospital-Cornell Medical Center. They had been stored at the Payne Whitney Psychiatric Clinic for an unknown period of time.

Biographical Note

One of the leading neurologists of his time, Dr. Harold G. Wolff is generally considered "the father of modern headache research" as well as being a pioneer in the study of psychosomatic illness. He spent most of his career at The New York Hospital-Cornell Medical Center.

Dr. Wolff was born on May 26, 1898, in New York City the only child of Louis Wolff, an illustrator of Alsatian descent, and Emma Recknagel Wolff. He was educated at City College of New York and Harvard Medical School from which he graduated in 1923. After clinical training at Roosevelt and Bellevue Hospitals, Dr. Wolff returned in 1926 to Harvard to work with Dr. Stanley Cobb and H. F. Forbes in their Neuropathology Laboratory. He spent 1928-29 in the laboratory of Otto Loewi at Graz, Austria, and while in Europe worked briefly under Ivan Pavlov in Leningrad. Upon his return to the U.S., Dr. Wolff studied with the psychiatrist Adolf Meyer at Johns Hopkins's Phipps Psychiatric Clinic during 1930-1931.

Dr. Wolff had been in contact with G. Canby Robinson, Director of the newly-established New York Hospital-Cornell Medical Center, since 1928. He seems to have been offered the position of Chief Neurologist in the spring of 1931, and, after several months in Europe studying hospitals, clinics, and medical schools, took up his duties at the Medical Center upon its opening in September, 1932. He remained at NYH-CMC until his death, eventually taking charge of the neurology service at Bellevue's Second (Cornell) Medical Division; he was named the first occupant of the Anne Parish Titzell Chair in Medicine (Neurology) in 1958.

Dr. Wolff's findings on the mechanism of headaches, especially migraine headaches, dominated thinking on the subject for a generation. His Headache and Other Head Pain, first published in 1948 became the authoritative text on the subject and has gone through several editions since.

Perhaps more lasting than his headache research, however, are Dr. Wolff's studies on psychosomatic illness. He saw disease in the framework of human ecology and drew upon the insights of anthropology and religion as well as of neurology and psychiatry to explore it. During his last years he devoted much of his energy to the work of the Academy of Religion and Mental Health and, after life-long agnosticism, became a member of St. John's Episcopal Church in

Biographical Note (cont)

Riverdale, New York.

Dr. Wolff married the well-known painter Isabel Bishop in 1934; their Riverdale home became a gathering place for members of New York's scientific and artistic worlds. Dr. Wolff died on February 21, 1962, in Washington, D.C. after suffering a stroke several days earlier at a conference. His memory is perpetuated at the Medical Center in the Harold G. Wolff Neurology Laboratory and in the research prize awarded to the CUMC student who "has completed the most outstanding piece of original research in the neurological or behavioral sciences."

Note on Arrangement

These papers when received by the Archives were in considerable disorder. They were partially processed in 1983 by Anne Guerrero, an Archives volunteer. They were reprocessed for greater accessibility in 1988 by Stephen E. Novak, the Assistant Archivist. It was at this time that the papers were arranged in series and about 16 inches of material (mostly duplicates and proofs) were discarded.

Scope and Content

The papers consist of correspondence, reports, manuscripts and drafts of articles, research notes, lectures, patient records, reprints, and monographs.

Series I Biographical Material, ca.1940s-1970 (Box 1:1-7)

This series is a collection of biographical material about Dr. Wolff including obituaries, news clippings, resumes, and correspondence relating to Dr. Wolff's death. It has been gathered together for easy accessibility.

Series II Correspondence and Subject Files, 1922-1963 (Box 1:8-Box 6)

The correspondence and subject files are undoubtedly the most interesting part of the collection. The General Correspondence, 1925 -1962 (2:11-3:4) contains letters from Dr. Wolff's scientific colleagues, students and patients; up until about 1950, however, this is a one-sided dialogue as few copies of Dr. Wolff's outgoing letters are preserved.

In contrast to the voluminous General Correspondence, the Personal Correspondence is skimpy and usually limited to household matters. There seem to be no letters present from Dr. Wolff's wife, Isobel Bishop, or their son, Remsen. There is also no correspondence from his student days at Harvard Medical School.

Scope and Content (cont)

The practice and teaching of neurology at the Medical Center are well-documented in the papers. There are annual reports of the Department of Neurology, 1933 -1960 (4:12 - 5:10), lecture outlines, student examination questions, and grades as well as various kinds of teaching materials and patient examination guides. Of particular interest is the Department of Neurology correspondence, 1928 - 1937, which contains letters among Drs. Wolff, G. Canby Robinson, and Eugene Dubois regarding the establishment of the department. It also includes Dr. Wolff's 1932 "Report on Undergraduate Neurological Education" in which he outlined his views on neurological instruction.

Another important topic on which some light is shed by the collection is Dr. Wolff's relationship with the Society for the Investigation of Human Ecology. Although the material included here does not reveal how much Dr. Wolff knew about the Society's backing by the Central Intelligence Agency, it does include annual reports, 1957 -1961, correspondence, and proposals for funding (6:15-16).

Among the neurologists who corresponded with Dr. Wolff were Stanley Cobb and H.F. Forbes at Harvard, Wilder Penfield at McGill, Walter Alvarez and Maurice Levine, and J. Groen of Amsterdam and Jerusalem. Unfortunately since the correspondence is arranged chronologically, the researcher needs to do some digging to locate these letters. Separate folders of correspondence can, however, be found for Adolf Meyer, Dr. Wolff's Johns Hopkins mentor; Dean Clark, a research assistant in Dr. Wolff's lab in the late 1930s who after developing tuberculosis spent time at the Trudeau Clinic; and Stewart G. Wolf, a Wolff collaborator in the late 1930s and early 1940s, whose correspondence is largely from his years with the Ninth General Hospital in the South Pacific theater of the Second World War.

Series III Manuscripts, Lectures, Notes, 1926-1962 (Box 7-15, 25)

This series is a miscellany comprised of manuscripts of articles; correspondence relating to these articles; notes and scientific data; and outlines of lectures either given by Dr. Wolff or attended by him. Most of the manuscripts here seem to have been eventually published; only those manuscripts with substantive emendation have been retained. Dr. Wolff's practice seems to have been to file letters relating to a specific article in that article's folder. While sometimes routine, this correspondence is often interesting and important. Although the series covers Dr. Wolff's scientific career from its beginnings in the mid-1920s until his death, much of the material is undated.

Series IV Patient Records, 1936-1961 (Box 16-17, 26)

Prominent among these are headache case histories collected by Dr. Wolff in the 1940s-1950s (16:3-4); his private patients' records (16:8-9; 17:1); and the records of prominent persons treated by him such as the New York Times columnist Arthur Krock and Iranian premier, Mohammed Mossadegh (17:2). The largest set of records here and perhaps the most interesting are case records of those patients Dr. Wolff saw while at the Phipps Psychiatric Clinic of Johns Hopkins in 1930-1931. (17:5-7; 26:1-2) While these records are not completely organized, they are still usable without too much effort.

Series V Reprints and Other Publications, 1927-1962 (Boxes 18-24)

The final series comprises reprints and other publications. It includes most of Dr. Wolff's monographs and many of the works to which he contributed chapters and papers. Most of Dr. Wolff's over 500 reprints are here either unbound (Boxes 18 - 22) or bound (6 vols.). An annotated List of Publications, located in Box 18, indicates what reprints are available and where they can be found.

Restrictions

All patient records are restricted under accordance with the HIPAA, Privacy Rule. Two folders contain confidential student information. Researchers should consult the Medical Archivist regarding access.

Non-Manuscript Material

Six folders of photographs have been removed to the Personal Photographs collections. Some of the images are included in the Digital Photo Catalog. An announcement for Dr. Wolff's 1949 Henry Jackson Lecture of the New England Heart Association can be found in the Reading Room Map Case, Drawer 2.

Box and Container List**Box 1 Series I: Biographical Material, ca. 1940s-1970**

- f.1 Biographical Material: Resumes; articles re Dr. Wolff
- f.2 Death of Wolff: Correspondence, 1962 -1964
- f.3 Harold G. Wolff Laboratories for Research in Neurology,
 NYH-CMC Dedication : Program, remarks, etc. 1968
- f.4 International Journal of Neurology: Issue dedicated to Dr. Wolff, 1962
- f.5 Memorial Fund, Awards, Lectures, etc., in memory of Dr. Wolff:
 Correspondence, programs, etc. 1960s
- f.6 News clippings, Articles, etc., re Dr. Wolff and his work, c. 1940s-1960s
- f.7 Obituaries and Eulogies, 1962 -1970

Box 1 Series II: Correspondence/Subject Files, 1922-1963

- f.8 American Medical Association Archives of Neurology: Dr. Wolff editorial re
 aim of journal, 1959
- f.9 American Neurological Association: Correspondence, 1956-1963, mostly
 re Archives of Neurology
- f.10 Aphasia: Patient examination forms, etc., c. 1935
- f.11 Appointments, NYH, CUMC and other institutions, 1926 -1961

Box 2 Series II: Correspondence/Subject Files, 1922-1963

- f.1 Appointments, Professional Societies, 1929 -1961
- f.2 Clark, Dean: Correspondence to and from Clark, 1929 -1940, re his neurological residency at NYH and stay at Trudeau Clinic for treatment of tuberculosis
- f.3 China, News clippings on, 1958
- f.4 Collegium Internationale Allergologicum, 2nd Symposium, Basle: Program, correspondence, abstracts, notes, 1955
- f.5 Collier's Encyclopedia: Correspondence and drafts of articles for the Encyclopedia, 1961
- f.6 Commonwealth Fund: Correspondence, outlines, etc., for postgraduate course in Psychiatric Education for General Practitioners, 1945 -1946
- f.7 Commonwealth Fund: Report by Wolff, et al, on "Medicine A" Clinic at NYH, 1946 -1948
- f.8-9 Conditioned Reflexes: Record of experiments performed on the dog "Kompa" at Johns Hopkins, April 1930- July 1931
- f.10 Cornell Medical Index, Chinese? or Japanese? Version, n.d.
- f.11 Correspondence, General, 1925 -1948

Box 3 Series II: Correspondence/Subject Files, 1922-1963

- f.1-4 Correspondence, General, 1949 -1963
- f.5 Correspondence, Personal, 1931 -1959
- f.6 Correspondence, Publications, 1930 -1962
- f.7 Cross-Cultural Study of a Group of Potential Leaders: Proposal, 1960s
- f.8 Curriculum, Medical: Notes, reprints, publications, etc., re medical education in Europe (mostly Britain) collected by Dr. Wolff in 1931-1932; includes memorabilia re his visit to Leningrad
- f.9 Defense Dept. (including Veterans Administration): Correspondence re Grants, appointments, 1946 -1959
- f.10 Florida Epidemic: Report by Dr. Wolff, 1954 -1957
- f.11 Foundation Grants, 1937 -1959
- f.12 Hardy-Wolff-Goodell Dolorimeter: Manufacturer's Specifications, n.d
- f.13 Headache and Other Head Pain: Reviews, 1948 -1957
- f.14 Headaches, Correspondence re, 1937 -1946
- f.15 Institute of Neurology, NYH: Proposals, reports, correspondence, floor plans, 1937 -1941

Box 4 Series II: Correspondence/Subject Files, 1922-1963

- f.1 Kingsbridge Veterans Administration Hospital: Criticism of and plan for neurological service, c. late 1940s
- f.2 Medicine, Dept. of, NYH: Correspondence of Dr. Wolff during his tenure as Acting Physician-in-Chief, 1941
- f.3 Medicine "A" Clinic (NYH?): Evaluation of therapeutic procedures, n.d.
- f.4 Meyer, Adolf: Correspondence, 1929 -1936
- f.5 National Committee for Mental Hygiene: Forms, information re Fellowships in Extramural Psychiatry
- f.6 National Institutes of Health: Grants, correspondence, etc., 1946 -1961
- f.7 National Research Council: Correspondence, 1927 -1958, mostly re Dr. Wolff's Fellowship in Medicine, 1928 -1929
- f.8 Neurological Examination of Patients, NYH-CMC, 1933
- f.9 Neurological Examination of Patients (NYH-CMC?): Outlines, 1953 and undated
- f.10 Neurological Examination of Patients: Various hospitals, 1930s?
- f.11 Neurological Examinations: Notes on methods; forms from British hospitals, 1931
- f.12-13 Neurology, Dept. of, NYH-CMC: Annual Reports, 1933-1945

Box 5 Series II: Correspondence/Subject Files, 1922-1963

- f.1-3 Neurology, Dept. of, NYH-CMC, 1946 -1960
- f.4 Neurology, Dept. of, NYH-CMC: Correspondence, 1928 -1937, largely re the establishment of the department. Includes Dr. Wolff's 1932 "Report on Undergraduate Neurological Education"
- f.5 Neurology, Dept. of, NYH-CMC: Lecture outlines, notes, c. 1932 -1960
- f.6 Neurology, Dept. of, NYH-CMC: Lecture outlines and notes, 1930s -1940s
- f.7 Neurology, Dept. of, NYH-CMC: Lecture outlines and notes for Second Year Course, 1930s, 1940s
- * f.8 Neurology, Dept. of, NYH-CMC: Student examination questions and grades, 1934 -1936 (Restricted)
- * f.9 Neurology, Dept. of, NYH-CMC: Students' grades and evaluations, 1952 (Restricted)
- f.10 Neurology, Dept. of, NYH-CMC: Teaching materials, articles, etc., 1930s-1940s
- f.11 Neuropathology Course: Criticisms, n.d.
- f.12 Neuropathology Instruction, Harvard (1927) and CUMC (1933-1937): Outlines, correspondence

Box 6 Series II: Correspondence/Subject Files, 1922-1963

- f.1 Neuropsychosomatic Medicine: Patient Questionnaires, n.d.
- f.2 Pain: Book review from The Journal-Lancet, 1957
- f..3 Pallesthesiometer: Test results of Dr. R. W. Laidlaw, Neurological Institute of New York, 1937
- f.4 Pavlovian Laboratories, Johns Hopkins, 25th Anniversary Program, 1955
- f.5 Peekskill Sanitary Survey: Report (by Wolff?), 1922
- f.6 Personality Maladjustment, Outline for Determination of, CUMC, Sept., 1934
- f.7 Psychiatric Residence Training Program: Proposal by Albert Stunkard, University of Pennsylvania, c. 1960
- f.8-9 Psychiatry, Dept. of, Johns Hopkins: Outlines, exams and other teaching materials, 1930s
- f.10 Psychosomatic Medicine: Proposals, correspondence, etc., re funding from L. N. Hofheimer Estate, 1944 -1950
- f.11 Psychiatry Course, College of Physicians and Surgeons, 3rd Year Schedule, 1935
- f.12 Rennie, Thomas A.C.: Obituary (by Wolff?), 1956
- f.13 Republic Aviation Corporation: Papers re Dr. Wolff's consultation, 1942
- f.14 Selective Service: Correspondence, program, etc., re meeting on psychiatric concerns, 1942; Report, 1951
- f.15 Society for the Investigation of Human Ecology: Annual Reports, 1957 -1961
- f.16 Society for the Investigation of Human Ecology: Proposals, correspondence, 1954 -1961
- f.17 Soviet Delegation, Visit to NYH-CMC, 1959: Program, article, biographies
- f.18 Stevens Institute of Technology, Human Engineering Lab: Results of Dr. Wolff's personality and aptitude test, 1936
- f.19 Time Magazine: Article re headache research, March 16, 1942
- f.20 Undergraduate Instruction in the Personality Functions and Psychiatry, Conference on, 1936: Notes, program
- f.21 Whitney Institute of Human Biology: Proposals, correspondence, 1945-46
- f.22 Wolf, Stewart G.: Correspondence, mostly while he was a member of the Ninth General Hospital, 1942-1945; 1956

Box 7 Series III: Manuscripts, Lectures and Notes, 1926-1962

- f.1 "All or None Theory for Muscle and Nerve Tissue": Dr. Wolff's report to the Journal Club, 1930
- f.2 Aneurysm, Leaking: Notes, 1932
- f.3 Asthma, Conference on, NYH: Transcript with emendations, November 12, 1942
- f.4 Autopsies: Notes on autopsies performed on seriously depressed patients, 1960
- f.5 "Biology of Human Values": Drafts, critique, c. 1946
- f.6 Blood Flow in the Gastrointestinal Tract of Man: Drafts, notes, correspondence, 1942
- f.7 Brain Anatomy Lectures, Johns Hopkins (Meyer) 1931: Drawings
- f.8 Brain Anatomy Lectures, Johns Hopkins (Meyer), 1931: Notes
- f.9 Brain Capillaries: Notes
- f.10 "Breech Presentation Treated by Prophylactic External Version": Drafts and notes, c. 1931
- f.11 "Calcium Metabolism in Patients with Convulsions (Epilepsy)": Notes and correspondence, c. 1939
- f.12 Central Nervous System in Human Disease, Role of: Notes, drafts of articles, 1960
- f.13 Cerebellar Symptoms and Signs: Notes on book?, lecture? by G. Holmes, n d.
- f.14 Cerebral Circulating Mechanisms - Vasodilation and Apoplexy: Notes
- f.15 Cerebral Circulation: Drafts of articles on various aspects, c. 1930s
- f.16 Cerebral Circulation: Manuscript., drafts, notes, correspondence, c. 1930

Box 8 Series III: Manuscripts, Lectures and Notes, 1926-1962

- f.1 Cerebral Circulation: Notes, bibliography, correspondence, 1935
- f.2 Cerebral Circulation - The Action of Histamine: Manuscripts, correspondence, illustrations, 1929
- f.3 Cerebral Circulation - Adaptive Capacity After Loss of Hemisphere Tissue: Drafts, notes, 1956
- f.4 Cerebral Circulation - Clinical Inferences From Experimental Studies: Manuscript with emendations, notes, 1930
- f.5 Cerebral Circulation - Vasomotor Phenomena: Notes, drafts, correspondence, c. 1935
- f.6 "Cerebral Circulation - Velocity of Inter-cranial Blood Flow ...": Data, notes, drafts, c. 1929
- f.7 Cerebral Circulation, Methods of Studying: Correspondence with L.S. Kubie; notes, drafts, etc. 1926 -1928
- f.8 Cerebral Dominance Conference, 1961: Program; notes for Dr. Wolff's paper

Box 8 (cont)

- f.9 "Cerebral Hemisphere Functions in Subjects with Injury": Manuscript, illustrations, n.d.
- f.10 Cerebral Vasomotor Effects: Notes, correspondence with Forbes, et al, 1935
- f.11 Cerebral Vessels, Effect of Drugs on: Drafts of various articles, c. 1930s
- f.12 Cerebrospinal Fluid, Forced Drainage of: Dr. Wolff's notes for discussion of papers given at N.Y. Neurological Society, 1932
- f.13 Cerebrospinal Fluid, Re-absorption of: Notes
- f.14 "Changes in Form and Function of Mucous Membranes ...": Manuscript, notes, correspondence with Alan Gregg, et al, 1946 -1947
- f.15 Chapman, Loring F.: Papers to be completed by him, n.d.
- f.16 Ciliary Ganglia and Acetylcholine: Notes, drafts and correspondence, 1933 -1936
- f.17 Compulsive Neurotics: Notes
- f.18 "A Concept of Disease": Manuscript of Dr. Wolff Address to the A.P.A., 1961
- f.19 "A Concept of Disease in Man": Manuscript with emendations, 1962
- f.20 Conditioned Reflex: Notes, correspondence, etc. 1928 -1932
- f.21 Conditioned Reflex: Lecture outlines, notes, manuscript, etc., 1930s

Box 9 Series III: Manuscripts, Lectures and Notes, 1926-1962

- f.1 Conditioning Process: Drafts of articles, program, 1955
- f.2 Congenital Defects: Notes, n.d.
- f.3 Convulsions, Therapeutic Conferences on: Notes, correspondence, 1937-1945
- f.4 Cornell Conferences on Therapy: Transcripts, 1938, 1942
- f.5 Creative Process: Notes & Articles, n.d.
- f.6 Delirium & Allied States, The Nature of: Manuscript, notes & correspondence with Adolf Meyer, 1934
- f.7 Determination of Alcohol in Blood, Sodium Bromide in Serum: Outlines, 1930s
- f.8 Diseases of the Nervous System, Intro to: Manuscript, late 1950s
- f.9 Dormant Human Potential: Notes, n.d.
- f.10 Dysergastic State: Notes, statistics, correspondence, 1927-1929, 1933
- f.11 Ear Cases: Notes
- f.12 Electrophysiology: Outline from H. Allenberg, illustrations, n.d.
- f.13 Emotions and Body Changes: Notes
- f.14 Familial Hemiplegic Migraine: Draft of chapter, correspondence, 1953
- f.15 Functional Connections est. by Spinal Nerves Regenerating into Preganglionic Sympathetic Nerve Trunks: Drafts, notes, illustrations

Box 9 (cont)

- f.16 Gastric Fistula, Studies on Subject with: Notes, drafts of articles, 1940s
- f.17 Growth Disorders: Notes
- f.18 Harvey Lecture: Illustrations, n.d.
- f.19 "Has Disease Meaning?": Manuscript, drafts, 1956

Box 10 Series III: Manuscripts, Lectures and Notes, 1926-1962

- f.1 Headache and Brain Tumor, Meningitis: Manuscript, notes, c. 1945
- f.2 Headache & Other Pain, Classification: Correspondence, notes, 1961
- f.3 Headache Lectures, 1930s-1950s,
- f.4 Headache Mechanisms: Articles, c. 1943
- f.5 Headache Mechanisms & Differential Diagnosis: Manuscripts, correspondence, 1945
- f.6 Headache Studies: Drafts & notes, 1940s-1950s
- f.7 Headache Studies: Manuscripts, 1950s
- f.8 Headache, Histamine: Correspondence with notes of Dr. E. Charles Kunkle, 1951-1952
- f.9 Headache, Vascular: Draft of article, n.d.
- f.10 Herzstein Lecture, San Francisco: Notes & drafts of Dr. Wolff's lecture, program, correspondence, 1950
- f.11 Hawkes Lecture, Florida: Notes of outlines of Dr. Wolff's lecture, "Disease & Man's Response to Threat.", 1955.

Box 11 Series III: Manuscripts, Lectures and Notes, 1926-1962

- f.1 "Highest Adaptive Functions of the Brian in Man During Stress": Draft of lecture delivered at Univ. of Nebraska, correspondence, 1955-1956
- f.2 "Highest Brain Adaptive Functions": Notes, drafts, c. 1955
- f.3 Highest Integrative Functions of Man During Stress: Notes, experimental data, n.d.
- f.4 "The Nature of the Highest Integrative Functions of Man": Manuscript, notes, c. 1952
- f.5 Hofer, Myron: paper submitted to Dr. Wolff by Hofer for Dr. Wolff's comments, c. 1960
- f.6 "The Hospital Psychiatric Consultant": Article by Wendell Muncie, MD, 1934
- f.7 "Human Ecology and the Science of Clinical Psychiatry": Address at dedication of Stanley Cobb Research Labs, MA General Hospital, 1960
- f.8 "Humoral Transmission of Chorda Tympani Stimulation": Paper given by Wolff before the NYAM, 1933, notes, drafts
- f.9 "Hypertension & Coronary Disease": Manuscript, n.d.
- f.10 "Hypertension as a Reaction Pattern to Stress...": Manuscript, 1948

Box 11 (cont)

- f.11 "The Influence of the Sympatric Nervous System on the Function of Skeletal Muscle": Draft, correspondence w/ Stanley Cobb, 1931-1932
- *f.12 Inter-cranial Pressure & Signs: Lectures, 1930 (Restricted)
- f.13 Laity Lectures, NYAM: Notes, outlines, reprints, correspondence, 1946-1951
- f.14 Lectures Notes: Various subjects, especially cortical functions, c. 1934-1937
- f.15 Lecture Notes: Dr. Wolff's notes on other CUMC faculty lectures including Ephraim Shorr, Philip Stimson, C. Rhodes, 1938-1941
- f.16 Lecture Notes: "When are We Sick?", 1953 and "Participation of the Nervous System in Processes Altering the Vulnerability of Tissues," 1954.
- f.17 Lecture Notes, 1949-1950
- f.18 Lecture Notes, 1956
- f.19 Lecture Notes: Notes for Dr. Wolff's last lecture to students, 02/10/1962
- f.20 Lectures, 1941-1961

Box 12 Series III: Manuscripts, Lectures and Notes, 1926-1962

- f.1 Lecture, Miscellaneous, 1950s
- f.2 "Life Situations, Behavior, Attitudes, Emotions & Renal Excretion of Fluid & Electrolytes...": Manuscript & correspondence, 1955
- f.3 Life Stress & Bodily Diseases: Manuscripts, notes, 1949-1955
- f.4 Medical Education, Place of Value Systems in: Notes, outlines, correspondence, 1960
- f.5 Medical Emergencies: Lecture, outlines, 1938-1941
- f.6 Mental Health & Mental Illness Conference, Oxford, England: Draft, correspondence, 1958-1959
- f.7 "Migraine": Script for radio show "Doctors Talk It Over," 1946
- f.8 Migraine Headaches, Management of: Manuscript, 1939
- *f.9 Migraine Management: Notes, drafts, 1938 (Restricted)
- f.10 Migraine & Psychotherapy: Notes, correspondence, c. 1945-1951
- *f.11 Migraine Sensitivity Threshold Experiments: Data, notes, 1939-1940 (Restricted)
- f.12 Migraines, "Definition of a Biochemical Agent Implicated in the Mechanism of a Vascular Headache of the Migraine Type," 1960
- f.13 Migraines, Hereditary: Notes & drafts for lectures, 1953
- f.14 "Multiple Sclerosis & Pregnancy": Draft of article, notes, 1944
- f.15 Muscular Dystrophy, Report of a Case: Draft, c. 1927, correspondence, 1936

Box 13 Series III: Manuscripts, Lectures and Notes, 1926-1962

- f.1 "Nature of Muscular Weakness in Graves Disease": Notes, drafts, review, 1933
- f.2 Nervous System: Notes, n.d.
- f.3 Nervous System Lectures: Notes, outlines, correspondence, 1959
- f.4 "Neural Mechanisms Involved in Itch": Manuscript, illustrations, 1951
