#### PROVENANCE:

This collection was donated by, Dr. Roy W. Bonsnes at an undetermined time.

#### ADMINISTRATIVE/BIOGRAPHICAL NOTE:

Dr. Roy W. Bonsnes was born in Oslo, Norway on March 15, 1909. He received a BS from the University of Connecticut in 1930 and later his PhD from Yale University in 1939. While studying for his PhD, he held various positions at the University of Connecticut, Connecticut Agricultural Experimental Station, and Yale University.

In 1940, he came to Cornell University Medical College as a research fellow in Biochemistry. He rose to associate professor of Biochemistry in OB/GYN in 1950. In 1943, he was appointed a chemist at The Lying-In Hospital (Woman's Clinic, New York Hospital). Later he was a chemist at the Central Laboratories, New York Hospital, 1957-60; and chemist at New York Hospital from 1961-1980.

He conducted research alongside Dr. Vincent duVigneaud, Chairman of the Department of Biochemistry at Cornell University Medical College, that involved physical and chemical studies on insulin. Beginning in 1943, while at the Department of OB/GYN at New York Hospital, he investigated various aspects of metabolism and kidney function in pregnancy and more practical aspects of fluid and electrolyte balance in both pregnant and non-pregnant patients. Some studies of chemical analytical methods were also conducted and the data from these studies have been reported in twenty eight publications.

Dr. Bonsnes' bibliography includes forty four publications. Dr. Roy W. Bonsnes died in 1993.

## **SCOPE AND CONTENT NOTE:**

The Roy W. Bonsnes PhD (1909-1993) Collection contains papers, research materials, and reprints created during his time at New York Hospital-Cornell Medical Center. Housed within three boxes, they are divided into six series. Offering a broad and detailed view into his professional life, this collection offers very little information on him personally.

#### Series I: Biographical, 1941-1985 (Box 1)

Arranged alphabetically, this series contains what little personal information we have regarding Dr. Bonsnes. Even the three diaries included in this series are mainly professional in content.

#### Series II: Correspondance, 1940-1977 (Box 1)

Arranged alpabetically, this series contains some personal but mainly professional correspondance Dr. Bonsnes conducted from 1940 to 1977.

#### Series III: Laboratory for Clinical Chemistry, 1949-1973 (Box 1-2)

Arranged alphabetically, this series contains documents pertaining to the Laboratory on Clinical Chemistry whose committee counted Dr. Bonsnes as a member for more than 25 years.

#### Series IV: Reprints, Manuscripts, Paper's, and Speeches, 1936-1980 (Box 2)

Arranged alphabetically, this series includes 43 of his 44 publications, as well as, various manuscripts and papers he authored. Speeches and talks he gave throughout his career are also included.

#### Series V: Research Files, 1939-1975 (Box 2-3)

Arranged alphabetically, this series contains the research files covering his extensive studies on Amniotic Fluid, Bilirubin, and Lipoprotein Electrophoresis, as well as, Cholesterol, Kidney Fluids, and Tetracycline.

## Series VI: Professional Activites & Miscellaneous, 1949-1987 (Box 3)

Arranged alphabetically, this final series in the collection contains' topics Dr. Bonsnes was interested in ranging from newsletters to new ways of drawing blood.
