**1975**

## INTRODUCTION

For many years Doris J. Lowe, who heads the Reference and Information Services of the library, has worked on the completion of the bibliography of the Cornell Indices. First, all information was gathered by inspection, and during the last years computer-assisted search methods were employed. The bibliography includes all papers found up to April of 1974. A serious effort to cite all papers which have dealt with the indices has been made. We would, of course, appreciate corrections and additions. The publication is a tribute to those who developed the Cornell Medical Index, especially to Dr. Keeve Brodman.

Erich Meyerhoff  
Librarian

## TABLE OF CONTENTS
