How to install EndNote on a tagged computer

7/03/2019

To install the WCM-licensed Endnote version on your computer, you will need to have your device tagged by ITS. Once you have a tagged device, follow the instructions below for installation of the software. The screenshots are taken from a Mac, but the workflow is the same for PCs.

1. Access the Self Service app / Software Center:

For Macs: Go to the Self Service app in the dock

For PCs: Go to Microsoft System Center > Configuration Manager > Software Center

2. Log in at right-hand panel:

Self Service			Q, Search
			Log In v
Adobe Air	Adobe Creative Cloud App Categories	Categories	
Adobe Reader XI		Citrix Receiver	Standard Applications Configuration Support Tools Security
INSTALL ((INSTALL 7)	Testing Internet Utilities

3. Search for endnote: Self Service	
	C endnote S
	pro2004
	Log Out
	Categories
	Standard Applications

4. Click on the "INSTALL" button:

5. Self Service will then install Endnote onto your computer:

6. When you first launch endnote on your computer, it will ask you if you wish to update the software. Select "Download and Install":

Now you should be all set! For help on using endnote, please check out our libguide.

If you need any assistance with the installation, you can <u>create a ticket with ITS</u>, or come to the library and visit the SMARTDesk.
