advertising

PRODUCT CLAIM ADVERTISEMENTS

a. **INCORRECT**

The image of the young girl in the ad is misleading because the fictional drug is approved for use only in adults 18 years of age and older.

 $Source: \underline{https://www.fda.gov/drugs/information-consumers-and-patients-drugs/prescription-drugs/prescripti$

advertising

Although claims generally must be supported by data from well-designed studies, consumers may not know if such studies exist or what they show. If **FDA** determines that claims are not supported, it will take action to have the ad fixed. In the short term, if you have doubts about a claim in an advertisement, you should talk to your healthcare provider.

Makes breathing easier ... immediately

This ad falsely 3 states that Arbitraer is approved to help control asthma symptoms. This fictional drug (see the Correct **Product Claim** Ad) is approved to treat seasonal nasal allergy symptoms.

3 Arbitraer will help control your asthma symptoms

Source: https://www.fda.gov/drugs/information-consumers-and-patients-drugs/prescription-drug-advertising

As stated 4 above, although claims generally must be supported by data from well-designed studies, consumers may not know if such studies exist or what they show. If **FDA** determines that claims are not supported, it will take action to have the ad fixed. In the short term, if you have doubts about a claim in an advertisement, you should talk to your healthcare provider.

This ad presents Arbitraer's risks in small type size and positions this information far from where the benefits are discussed, so it is harder for the reader to notice and read the risks. <u>"Fair</u> balance" requir es that risks and benefits be similarly clear.

This advertisement is entirely fictional—no connection between "As and any real company or product is intended, evipressed, or imp.

advertising

b. **CORRECT**

Source: https://www.fda.gov/drugs/information-consumers-and-patients-drugs/prescription-drug-advertising

Product claim ads must identify the drug's brand and generic names. The ad correctly mentions the fictional drug's brand name, Arbitraer, and its generic name, misvastatium.

Product claim ads must accurately state an FDA-approved use for the drug. In addition, the ad may not make a claim that is not supported by substantial evidence or substantial clinical experience. This ad appropriately states that Arbitraer is approved to treat seasonal allergy symptoms.

Product claim ads should say that the drug is given by prescription only. This ad appropriately states that Arbitraer is a prescription drug.

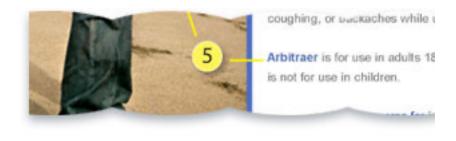

Source: https://www.fda.gov/drugs/information-consumers-and-patients-drugs/prescription-drug-advertising

This ad provides the required "fair balance" of information about the risks and benefits of Arbitraer. The ad as a whole does not put more emphasis on the drug's benefits than its risks.

The man on the beach who is pictured in the ad is in the approved age range for users of the drug. The ad also reinforces this point by stating that Arbitraer is for adults 18 and older and is not for use in children.

As required by the Food and Drug Amendments Act of 2007, print ads must include the statement "You are encouraged to report negative side effects of prescription drugs to the FDA. Visit MedWatch, or call 1-800-FDA-1088."

Source: https://www.fda.gov/drugs/information-consumers-and-patients-drugs/prescription-drug-advertising

Print ads must include a 7 "brief summary" of all the risks listed in the drug's FDA-approved prescribing information. The "brief summary" contains one or more pages of important information about a drug's risks. The "brief summary" usually follows the part of the ad that displays colorful images and graphics. View the Brief Summary (23Kb)

The ad directs the reader to seek a doctor's advice about taking Arbitraer.
The drug company has included this statement as a way to ensure that a consumer will not think he or she is qualified to make the prescribing decision.

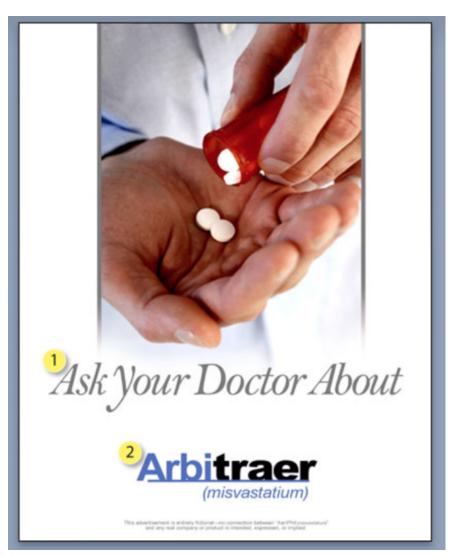

Product claim ads may provide sources of further information, such as a website and toll-free telephone number.

advertising

REMINDER ADVERTISEMENTS

a. CORRECT

The ad does not describe or name the condition the drug treats or make dosage recommendations. Notice that neither allergies nor any allergy symptoms are mentioned or pictured.

Source: https://www.fda.gov/drugs/information-consumers-and-patients-drugs/prescription-drug-

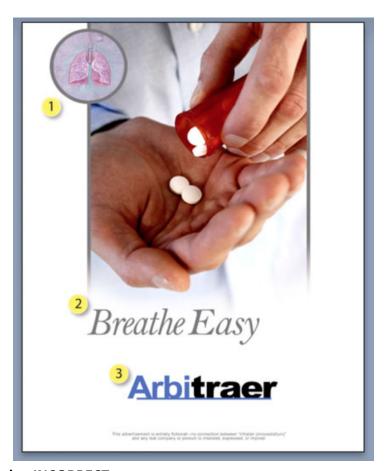

advertising

Reminder ads 2 must identify the drug's brand name (if it has one) and its generic name. The ad correctly mentions the fictional drug's brand name, Arbitraer, and its generic name, misvastatium.

Source: https://www.fda.gov/drugs/information-consumers-and-patients-drugs/prescription-drug-

advertising

b. **INCORRECT**

The picture of a set of lungs suggests that the drug works on someone's lungs or on their breathing. This picture is not allowed in a reminder ad because these ads cannot suggest

Source: https://www.fda.gov/drugs/information-consumers-and-patients-drugs/prescription-drug-advertising

what the drug does.

The phrase 2 "Breathe Easy" suggests the drug will help a person breathe easier. This kind of statement is not allowed in a reminder ad because it suggests the condition the drug treats. Reminder ads must not say or suggest any benefit of the drug, or such things as who should take it.

All reminder ads must mention the drug's bran d name (if it has one) and generic name.
While this ad includes the fictional drug's brand name,

advertising

Help-Seeking Advertisements

a. **INCORRECT**

The ad describes the symptoms of seasonal allergies, but it also includes the name of a specific (fictional) drug ("Arbitraer") . Therefore,

 ${\color{red} \textbf{Source:}} \ \underline{\textbf{https://www.fda.gov/drugs/information-consumers-and-patients-drugs/prescription-drug-advertising}$

we would consider it a product claim ad. As a result, the ad needs to meet all the requiremen ts for a product claim ad.

To be a helpseeking ad, the text cannot recommend a specific drug as a treatment. Because it directs the reader to ask about a specific drug, we would

> consider the ad a product claim ad. Directing the reader to ask a healthcare provider about symptoms

appropriate
. To be a
help-

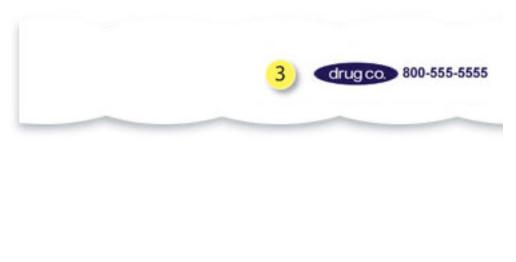

seeking ad, it could say, "Ask your healthcare There is help. There is Arbitraer.

Ask your healthcare provider to prescribe Artbitraer.

Source: <a href="https://www.fda.gov/drugs/information-consumers-and-patients-drugs/prescription-drug-drugs-drug advertising

provider what you can do."

Help-3 seeking ads may identify the company sponsoring the ad and provide a telephone number to call or a website to visit for more information.

Source: https://www.fda.gov/drugs/information-consumers-and-patients-drugs/prescription-drug-

advertising

c. **CORRECT**

The image in this ad identifies a person who may have seasonal allergy symptoms. The ad does not show an image of a specific drug.

Source: https://www.fda.gov/drugs/information-consumers-and-patients-drugs/prescription-drugadvertising

This helpseeking ad identifies seasonal allergy symptoms without identifying a possible drug treatment.

This and any help-seeking ad may recommen d that readers seek the advice of their healthcare provider.

There is help.

Ask your healthcare provider for more information.

While this ad may not name a drug, it may identify the company sponsorin g the ad and provide a telephone number to call or a website to visit for more informatio n.

This advertisement is entirely fictional- no connection between "Artificial Igeneric name" and any real company or prouch is intedned, expressed, or implied
