He also collaborated with Dr. Benjamin Kean on developing a surgical treatment for schistosomiasis, an intestinal parasite.

Dr. Goldsmith was interested in the use of primates in medical research. He was involved in establishing the Laboratory for Experimental Medicine and Surgery in Primates, an inter-institutional laboratory in Sterling Forest, NY, and served as the laboratory chairman of Utilization Committee. He was very active in professional organizations related to use of primates in medical research including the chairman of the Committee of Scientists for the Use of Primates in Medical Research and the co-chairman of the Conferences on the Experimental Medicine and Surgery in Primates. He published numerous articles including the series on Primates in Medicine.

He died on June 11, 1985 of leukemia.
