**Finding Aid To
THE HARRY GOLD, MD (1899-1972) PAPERS**

**Dates of Papers:
1922-1972**

**231.5 Linear Inches
(21 Boxes)**

PROVENANCE:

The Harry Gold, MD Papers were donated by the family of Harry Gold, MD to the Medical Center Archives in 1973.

ADMINISTRATIVE/BIOGRAPHICAL NOTE:

Harry Gold was born in Russia on December 25, 1899 and immigrated to the United States as an infant. While studying at Cornell University in Ithaca, New York he was elected to Phi Beta Kappa, and, in 1919, graduated with a bachelor of arts. Three years later, Dr. Gold earned his medical degree from Cornell University Medical College (now Weill Cornell Medical College).

Immediately following graduation, the Medical College hired Dr. Gold as an instructor in pharmacology, a position he retained until his promotion in 1929 to assistant professor. In 1944 he became associate professor of pharmacology and, three years later, earned the title of full professor. Dr. Gold served in this capacity until his retirement in 1965, whereby he received the distinction of professor emeritus. From 1930 through 1935, Dr. Gold taught graduate courses in medicine at Rutgers University and from 1945 through the early 1950s lectured at Seton Hall University on topics which included therapeutics, cardiology, electrocardiology and cardiac fluoroscopy.

In addition to an academic career that spanned over forty years, Dr. Gold also served as a physician and medical consultant for several hospitals in New York and elsewhere. From 1922 to 1931 he worked as an assistant physician at Bellevue Hospital and from 1931 through the mid-1960s as an attending physician at Beth Israel Hospital and the Hospital for Joint Diseases where he conducted much of his research in their cardiac clinics. Dr. Gold served as the attending-in-charge of the Cardiovascular Research Unit at Beth Israel and the chairman of the Medical Advisory Board at the Hospital for Joint Diseases. In the mid-1960s he transitioned from staff physician to consultant at both hospitals. From 1942 through 1967, Dr. Gold also served as a physician to out-patients at New York Hospital. Dr. Gold tendered his services at a number of other institutions, including Saint Vincent's, Sea View, Richmond Memorial and Doctors Hospitals, as well as Saint Francis Sanatorium for Rheumatic Children, the New York Cardiac Center, and a number of others.

As a pharmacologist and cardiologist, Dr. Gold helped pioneer the standardization of digitalis compounds for the treatment of heart disease. His work focused on diuretics and anti-hypertensive medication and relied heavily on the use of placebos when evaluating the efficacy of various drugs. Dr. Gold was among the first to promote the double-blind test wherein neither the researcher nor the patient knows which medication (or placebo) each individual in the study is receiving. Only after the study concludes is the information revealed.

Along with his faculty and staff appointments, Dr. Gold was a fellow of the New York Academy of Medicine, the American Medical Association, the New York Academy of Sciences and the American Association for the Advancement of Science. He also served as a director of the New

York Heart Association and a member of numerous professional organizations including, among others, the American Society for Pharmacology and Experimental Therapeutics, the Revision Committee for the U.S. Pharmacopoeia, and the American Heart Association.

Dr. Gold was married to Bertha Gold, emeritus professor of physiology at Hunter College. They raised three children, Stanley, Muriel and Naomi.

Dr. Gold died of a stroke on April 21, 1972 at the age of 72 at his home in New York City.

Bibliography:

Bulletin and Calendar of Events, The New York Hospital-Cornell Medical Center, Vol. 12, No. 37, May 31, 1971.

“Harry Gold, a Heart Specialist and Digitalis Pioneer, is Dead.” *New York Times* 22 April 1972.

SCOPE AND CONTENT NOTE:

The Harry Gold Papers span from 1922 to 1972 and comprise the personal and professional papers of Dr. Harry Gold, a former faculty member of Cornell University Medical College and physician at New York Hospital. Dr. Gold’s papers follow his rise from instructor of pharmacology to professor emeritus and from assistant physician to attending-in-charge. His correspondence, research notes and hospital documentation shed light on the medical practice, policy, and theory of the first half of the 20th century, and, at the same time, chart his own success as both an educator and investigator.

The Harry Gold Papers is divided into twelve series: Correspondence (1928-1972); Speaking Engagements (1931-1966); Cornell University Medical College/New York Hospital (1936-1966); Hospital for Joint Diseases (1929-1966); Beth Israel Hospital (1931-1970); Additional Hospital and Institutional Affiliations (1933-1972); State and National Committee/Professional Organization Participation (1928-1969); Digitalis Research (1922-1965); General Research (1922-1969); Reprints (1923-1970); Personal/Biographical Files (1942-1966); Photographs and Illustrations (1949-1960).

Series I: Correspondence, 1928-1972 (Boxes 1-6)

Series I contains personal and professional correspondence written by and addressed to Dr. Harry Gold. The series is divided into four sub-series. The first sub-series consists of Dr. Gold’s general correspondence and includes items of both personal and professional interest dating from 1928 through 1972. Letters to and from hospital and university colleagues, as well as medical consultants, pharmaceutical manufacturers, and local and national organizations to which Dr. Gold belonged make up the bulk of the first sub-series. These files deal primarily with Dr. Gold’s research activities and highlight his involvement in the medical community.

Along with his professional correspondence, letters and conversations of a more personal nature are also found within the first sub-series, and include those between Dr. Gold and family

members and friends. These address births and deaths, weddings, religious events and social activities. Such conversations are often found alongside more professional matters; many of Dr. Gold's colleagues became close friends. This sub-series is arranged in alphabetical order by correspondent. Unsorted correspondence files are arranged at the end of the sub-series.

The second sub-series, spanning from 1932 through 1969, consists of correspondence files between Dr. Gold and the individual physicians and researchers employed in the cardiology labs at both Beth Israel Hospital and the Hospital for Joint Diseases. These files document the digitalis and diuretics studies conducted at both institutions and the way in which Dr. Gold operated each of his laboratories and clinics. The correspondence within this sub-series also serves as an inventory of those who contributed to Dr. Gold's work by staffing his cardiology clinics. This sub-series is arranged alphabetically by correspondent.

The third sub-series spans from 1942 to 1965 and is comprised of letters of recommendations written by Dr. Gold on behalf of his students, assistants and colleagues for college and graduate school admissions, academic positions, and professional organization memberships. Because of the sensitive nature of the documents, the entire sub-series is restricted. Like the two preceding sub-series, the files are arranged in alphabetical order.

The fourth sub-series spans from 1942 to 1967 and is made up of correspondence between Dr. Gold and the editors of various medical publications. The majority of the files document Dr. Gold's conversations with the editors of the "Progress" Section of the American Journal of the Medical Sciences (he too served as an editor). This sub-series also includes two folders of correspondence regarding the publication "The Interne" and Dr. Gold's participation as an editorial board member. The sub-series is arranged chronologically by publication.

Series II: Speaking Engagements, 1931-1966 (Boxes 7-8)

Files documenting Dr. Gold's lectures and speaking engagements comprise the second series of the collection. This series is divided into two sub-series. The first sub-series contains lecture invitations Dr. Gold received from university and hospital administrators, professional organizations, and medical students to address both academic and non-academic audiences, participate in conferences, and lead workshops. Within the folders are correspondence files, typed lectures, research notes, reprints and articles, and event planning materials. The sub-series spans from 1931 through 1966 and indicates not only the frequency of Dr. Gold's travels, but the popularity of his research among both the medical and the lay community.

Spanning from 1945 to 1951, the second sub-series within Series II contains the lecture transcripts of post-graduate courses Dr. Gold offered at Seton Hall University and at its medical center in Newark, New Jersey. The drafts and final copies of Dr. Gold's lectures found within this sub-series document what was then known of various ailments and conditions and illustrate the medical practices used to treat them.

Both sub-series are arranged chronologically.

Series III: Cornell University Medical College/New York Hospital, 1936-1966 (Box 9)

Series III consists of Dr. Gold's files pertaining to his tenure at Cornell University Medical College and New York Hospital. As both a Cornell University and Cornell University Medical College alumnus and an employee of the institution, the Cornell files in this series reflect both roles. The bulk of the series, though, emphasizes Dr. Gold's professional career and the complementary work in which he engaged between both the Medical College and New York Hospital. Files within this series include college and hospital department and committee notes, lecture and conference announcements, annual progress reports, membership cards and staff appointment forms, institutional publications, donation correspondence, NIH grant-funded research materials, and an index of Dr. Gold's assistants, among other files.

The series is arranged alphabetically by subject.

Series IV: Hospital for Joint Diseases, 1929-1966 (Box 9)

Dr. Gold joined the staff of the Hospital for Joint Diseases in 1931 and remained an employee for over three decades. This series consists of the materials he accumulated while an HJD physician. The bulk of the files document Dr. Gold's administration of the hospital's cardiac clinic, the cardiology conferences sponsored by the hospital, and the Medical Advisory Board he chaired.

The files are arranged alphabetically by subject.

Series V: Beth Israel Hospital, 1931-1970 (Box 10)

At the same time as Dr. Gold joined the staff of the Hospital for Joint Diseases in 1931, he did so at Beth Israel Hospital as well. The majority of his files reflect his role as the attending-in-charge of the hospital's Cardiovascular Research Unit. Among the files are cardiac clinic and research unit staff lists, departmental and administrative correspondence, annual reports and cardiology conference materials. Donation and grant files, medical staff directories and medical board committee notes are also included.

The series is arranged alphabetically by subject.

Series VI: Additional Hospital and Institutional Affiliations, 1933-1972 (Box 11)

In addition to his primary work at New York Hospital, Beth Israel and the Hospital for Joint Diseases, Dr. Gold held staff positions and consultancies at a variety of other hospitals and institutions. This series contains correspondence files, appointment records, and assorted materials documenting Dr. Gold's work at and recommendations for these various institutions.

The series is arranged alphabetically by hospital and institution.

Series VII: State and National Committee/Professional Organization Participation, 1928-1969 (Box 12)

This series reveals Dr. Gold's contributions as a member of local and national medical committees and professional organizations. Dr. Gold sat on the editorial boards and advisory committees of several organizations, including the American Academy of General Practice, the Medical Society of the State of New York and the New York State Journal of Medicine.

This series is arranged alphabetically by organization.

Series VIII: Digitalis Research, 1922-1965 (Boxes 12-14)

During his tenure as a pharmacologist and cardiologist, Dr. Gold helped pioneer the field of digitalis studies. His research on digitalis and its compounds contributed to a more thorough understanding of the cardiac glycosides, of their benefits and their risks, and ultimately paved the way for better defined standards of production and use.

The series is divided into three sub-series. The first, which spans from 1924-1960, consists of correspondence dealing with Dr. Gold's digitalis research. Topics covered include bio-assay preparation, research collaboration with the New York Heart Association, and study findings. The sub-series is arranged alphabetically by correspondence topic.

The second subseries covers Dr. Gold's work from 1922 to 1960 and consists of research notes and bio-assay results. It includes correspondence files between Dr. Gold and the various laboratories and pharmaceutical companies with which he collaborated on digitalis studies and who provided him the tinctures and preparations used in his bioassays on humans, cats, frogs and pigeons. The sub-series also includes comparisons of digitalis alternatives for the treatment of heart disease, such as the use of convallaria and strophanthin and the results of Dr. Gold's numerous studies on cardiac glycosides. Drafts of digitalis manuscripts are also found within the sub-series. The sub-series is arranged alphabetically by subject.

Dr. Gold's comparisons of specific digitalis compounds such as digifolin, digilanid and digitoxin comprise the third and final sub-series of Series VIII. Correspondence, research notes and bio-assay results from 1926 through 1965 highlight Dr. Gold's extensive studies. Manuscripts and papers documenting his lab work are also included. The sub-series is arranged alphabetically by digitalis compound.

Series IX: General Research, 1922-1969 (Boxes 14-18)

Documenting nearly half a century of medical practice, Dr. Gold's general research files address well over one hundred subjects, with emphasis placed on barbiturate, cinchona alkaloid and diuretics studies, heart conditions and heart disease, and the development of experimental drugs. As an expert in the field of human pharmacology, Dr. Gold examined numerous medications, including both those with FDA approval as well as those still in trial phase to better determine their use and their effectiveness. Dr. Gold's general research files record these studies and help shed light on 20th century medical practice. The files within this series consist of Dr. Gold's

handwritten and typed notes, as well as journal articles, newspaper clippings, brochures and advertisements for new medications, and academic papers.

The series is arranged alphabetically by subject.

Series X: Reprints, 1923-1970 (Box 18)

This series contains reprints of Dr. Gold's articles arranged in chronological order. Also included within the series are drafts of some of Dr. Gold's papers as well as an inventory of reprints compiled during an earlier processing of the collection.

Series XI: Personal/Biographical Files, 1942-1966 (Box 18)

This series, arranged alphabetically, consists of three folders of personal and biographical files relating to Dr. Gold. The files include Dr. Gold's health reports, vaccination records, passports, family finances, household memos, and World War II classification records.

Series XII: Photographs and Illustration, 1949-1960 (Box 18)

This series contains two photographs and one illustration found loose within Dr. Gold's collection. The label on one of the photographs, a portrait of a woman, suggests the subject's name was Clara Sippell, though the spelling is difficult to decipher. The other photograph offers an exterior view of the University of Concepcion Medical School in Chile. A medical illustration on cardboard stock is also included.

PROCESSING NOTE:

The collection was processed by Rachel Moskowitz in February 2012. According to the box notations, the collection had also been partially processed in the early 1990s. Care was taken to preserve what likely reflected Dr. Gold's original series arrangement.

Original folder titles were preserved when such existed and accurately reflected the contents of the folders. Materials in binders, envelopes, and loose were foldered and new titles were given to these materials.

Unprocessed boxes 19-21 and information regarding the provenance of the collection were added by Nicole Milano in 2020.

ACCESS RESTRICTIONS:

This collection is open to researchers, with the exception of boxes 19-21, which are unprocessed and require review by Archives staff prior to access by researchers.

Folders with confidential patient health information, student records, and other personally identifiable information are restricted due to HIPAA, FERPA, and additional PHI regulations.

Individual folders are marked "RESTRICTED" if they are known to contain restricted materials. If the researcher chances upon an unrestricted folder that contains patient or student records, the researcher is asked to discontinue use of the documents immediately and notify the archivist.

PREFERRED CITATION:

Identification of document; Date (if known); Harry Gold, MD (1899-1972) Papers; Box and Folder Numbers; Medical Center Archives of New York-Presbyterian/Weill Cornell.

ACCESS POINTS:

Gold, Harry, 1899-1972.
Cornell University -- Joan and Sanford I. Weill Medical College.

Folder:	Description:
1	Barbiturates -- Phenobarbital and Sigmodal Studies, 1943
2	Barbiturates -- Phenobarbital, Pernoston, Nembutal Studies, 1943
3	Barbiturates -- "Comparative Study of Several Barbiturates with Observations of Irreversible Neurological Disturbances," 1943, 1946
4	Barbiturates and Morphine, 1943 (RESTRICTED, PHI)

- 5 **Barbiturates -- Poisoning, 1934-1948 (RESTRICTED, PHI)**
6 Barbiturates -- Poisoning -- Picrotoxin Effects, 1936-1941
7 Barbiturates -- Regulations, 1945-1950
8 Barbiturates -- Sigmoidal, 1942
9 **Barbiturates Study, 1947-1950 (RESTRICTED, PHI)**
10 Benzedrine, 1937-1938
11 Bile Decholin Study, 1935
12 Bioassay -- Explanations and Examples, 1933-1948
13 Bladder Functions and Disturbances, n.d.
14 Blood Pressure -- Methodology, 1962
15 Bromides, 1936-1945
16 Caffeine, 1937-1948
17 Cancer Study in Rats, 1925
18 **Carbon Monoxide Poisoning, 1941-1950 (RESTRICTED, PHI)**
19 Cardiac Infarction -- Draft Reprint of Manuscript, "The Effect of
 Theophylline with Ethylenediamine on the Course of Cardiac Infarction
 Following Experimental Coronary Occlusion" (incl. original photographs),
 n.d.
20 Cardiovascular Agents Re: Article for the Encyclopedia of Chemical
 Technology, 1946-1948
21 Cartoid Sinus Reflex (including lecture), 1935, 1937
22 Chlorazol, 1935-1940
23 Cholinergic Drugs, 1947
24 Cigarette Toxicity -- Data, 1941-1942
25 Cigarette Toxicity -- Glyceryl Trinitrate Cigarettes, 1953-1959
26 Cigarette Toxicity -- Smoke and Tobacco Notes and Paper, 1942
27 Cinchona Study -- Blank Data Forms, n.d.
28 Cinchona Study -- Cinchona Alkaloids Structure and Properties, n.d.
29 Cinchona Study -- Comparison of F-F Intervals, n.d.
30 **Cinchona Study -- Dosage Response Curves, n.d. (RESTRICTED, PHI)**
31 Cinchona Study -- Drug Ceiling Study, n.d.
32 Cinchona Study -- Effect on Experimental Infections, 1943-1944
33 **Cinchona Study -- Effect of Quinine and Related Compounds on F-F
 Intervals of Auricular Fibrillators, n.d. (RESTRICTED, PHI)**
34 Cinchona Study -- Hypertension, 1949-1950
35 **Cinchona Study -- Persistence of Action of Cinchona Alkaloids, n.d.
 (RESTRICTED, PHI)**
36 Cinchona Study -- *Quinidine – Disorders of the Heart* Book
 Correspondence, 1949-1952
37 Cinchona Study -- Quinine and Quinidine Anti-Malarial Use, 1935-1948
38 Cinchona Study -- Quinine and Quinidine in Cardiovascular Disorders,
 1932-1952
39 **Cinchona Study -- Quinine, Quinidine, Dihydroquinidine Auricular Rate,
 n.d. (RESTRICTED, PHI)**

- 40 Cinchona Study -- Relative Potency of Cinchona Alkaloids on the F-Rate of the Circus Movement in Auricular Fibrillation, 1946 (RESTRICTED, PHI)
- 41 Cinchona Study -- USP Quinidine Study, 1945-1946 (RESTRICTED, PHI)
- 42 Cinchona Study -- Final Paper -- Tables, Figures, Notes, 1946, n.d.
- 43 Cinchona Study -- Paper I Outline, 1948
- 44 Cinchona Study -- Paper, "Quinidine Sulfate in Propylene Glycol by Intramuscular Injection in Man," 1935-1952
- 45 Cinchona Study -- Paper, "Relative Potencies of Various Cinchona Alkaloids in Patients with Auricular Fibrillation," 1949
- 46 Circulation and the Circulatory System, n.d.
- 47 Clinic Failure Study (USPH), 1950
- 48 Cocaine -- Applied to Fourth Ventricle, 1934, 1936
- 49 Cocaine -- Cocaine-Barbital Antagonism, 1930, 1934-1935 (folder 1/3)
- 50 Cocaine -- Cocaine-Barbital Antagonism, 1934-1935 (folder 2/3)
- 51 Cocaine -- Cocaine-Barbital Antagonism, 1934-1935 (folder 3/3)
- 52 Cocaine -- Cocaine and Barbiturates Paper Outline, 1936
- 53 Congestive Failure Study -- Mercurial Diuretics vs. Digitalis Treatment, 1949 (folder 1/3)
- 54 Congestive Failure Study, 1946-1948 (folder 2/3)
- 55 Congestive Failure Study, 1948-1951 (folder 3/3)
- 56 Congo Red, 1948-1949
- 57 Cor Pulmonala, 1934-1949
- 58 Coronary Disease and Treatment, 1932-1946
- 59 Coronary Ligations Study, 1936
- 60 Coronary Thrombosis, 1932, n.d. (folder 1/2)
- 61 Coronary Thrombosis, 1931-1943 (RESTRICTED, PHI) (folder 2/2)
- 62 Cortisone, 1949-1950
- 63 Cough, 1939-1948

Box 16: Series IX, General Research, 1922-1969

Folder:	Description:
1	Curare Effect of Various Drugs, 1933-1934 (folder 1/3)
2	Curare Effect of Various Drugs, 1933-1934 (folder 2/3)
3	Curare Effect of Various Drugs, 1933-1934 (folder 3/3)
4	Curare Lecture at Cornell Conference on Therapy, n.d.
5	Curare-Physostigmine, Physostigmine-Atropine Antagonism, 1936
6	Curare Vomiting Study with Apomorphine, 1935-1937
7	Curare Vomiting Study with Digitalis, 1935-1937
8	Cyanide -- Methylene Blue, 1933, 1935
9	Cymarine, 1947-1948
10	Cytochrome (incl. correspondence with Ezra Levin of Viobin Corporation), 1946-1948
11	DDT Protocols, 1945

- 12 Decholin Sodium, 1941-1944
- 13 Decholin Sodium, 1944-1946
- 14 Dinitrophenol, 1933-1936
- 15 Diuretics Studies, 1942, 1959
- 16 Diuretics Studies, 1946-1960
- 17 Diuretics Studies (incl. important papers according to original folder), 1958-1964, n.d.
- 18 Diuretics Studies -- Aldosterone Antagonists, 1957-1960, n.d.
- 19 Diuretics Studies -- Comparison of Hydrochlorothiazide (orally) vs. Meralluride (intramuscularly), 1963-1964 (RESTRICTED, PHI) (folder 1/2)
- 20 Diuretics Studies -- Comparison of Hydrochlorothiazide (orally) vs. Meralluride (intramuscularly), 1963-1964 (RESTRICTED, PHI) (folder 2/2)
- 21 Diuretics Studies -- Mercuhydrin Assay Data, 1945-1958 (RESTRICTED, PHI)
- 22 Diuretics Studies -- Mercuhydrin Induced Weight Loss with First Dose in Patients with Edema, 1962 (RESTRICTED, PHI)
- 23 Diuretics Studies -- Mercuhydrin in Patients with Edema, 1942-1956, 1959 (RESTRICTED, PHI)
- 24 Diuretics Studies -- Mercurial Diuretics Papers, 1952
- 25 Diuretics Studies -- Mercurial Diuretics Reports/Research for Lakeside Laboratories, 1950-1952
- 26 Diuretics Studies -- Mercurial Diuretics Research, 1949-1952 (RESTRICTED, PHI)
- 27 Diuretics Studies -- Neohydrin and Other Agents, 1958-1961 (RESTRICTED, PHI)
- 28 Diuretics Studies -- Triamterene vs. Other Diuretic Agents, 1960, 1962-1963 (RESTRICTED, PHI)
- 29 Diuretics Studies: Triamterene vs. Other Diuretic Agents, 1963 (RESTRICTED, PHI)
- 30 Drug Therapy -- Manuscript Draft, n.d.
- 31 Emetic Mechanisms (vomiting), 1948, 1952, n.d.
- 32 Ephedrine, 1927, n.d.
- 33 Epinephrine, 1946, 1948
- 34 Ergot, 1938-1945, n.d.
- 35 Ether -- Correspondence, Re: Publications, Reprints, and Ether Research, 1933-1941 (RESTRICTED, PHI)
- 36 Ether -- Correspondence, Re: Publications, Reprints, and Ether Research, 1942-1948
- 37 Ether -- Research Notes, Data, and Reports, 1933-1951
- 38 Electrocardiography and Fluoroscopy Re: Slides Used in Lectures, 1947-1949
- 39 Glycine Protocols, 1942
- 40 Heart and Heart Disease -- Flutter and Fibrillation (lecture), n.d.
- 41 Heart and Heart Disease -- Hemorrhage, 1938, 1942

42	Heart and Heart Disease -- Thyroid Problems, 1924, 1941
43	Heart and Heart Disease -- Weight, 1934-1938, 1950
44	Histamines, 1939
45	Hormones (male sex), n.d.
46	Hormones -- Estrogenic, 1933-1942
47	Hormones -- Gonadogenic and Gonadotropic, 1932, 1937, n.d.
48	"Human Assays – General Considerations" -- Paper Re: Methods and Practice, n.d.
49	Hyaluronic Acid, 1948, 1952
50	Hypertension -- Research and Literature, 1927-1960
51	Industrial Medicine, n.d.

Box 17: Series IX, General Research, 1922-1969

Folder:	Description:
1	Insulin (incl. lecture in Atlantic City), 1937-1940, 1948
2	Iodides, 1951
3	Iodide Testimony and Case Report, 1933 (RESTRICTED, PHI)
4	Khellin Study, 1948-1950
5	Khellin Study, 1949
6	Khellin Study, 1948-1950
7	Khellin Study, 1949-1952
8	Laxative Study in Constipated Human Subjects, n.d.
9	Librium Study -- Effect on Cardiac Pain, 1964
10	Liver Extract, 1935-1948
11	Magnesium-Barbital Synergism, 1932
12	Malaria, 1938-1944
13	Mecholyl, Peptic Ulcer, 1937
14	Mercury/Mercuric Chloride Literature and Notes, 1935, 1942, n.d.
15	Metal Poisoning, 1937, n.d.
16	Metrazol, 1939
17	MFA Protocols, 1944
18	Miscellaneous Research Notes -- Placebos, Ethics in Human Experimentation, Clinical Pharmacology, etc., 1945-1964
19	Morphine, 1936-1942
20	Morphine-Apomorphine, 1927
21	Muscarine-Cholines, 1935
22	Muscle Twitching Study, 1935
23	MyO ₂ Study -- Correspondence, 1961-1963
24	MyO ₂ Study -- Meeting Notes (7/7/66), 1966
25	MyO ₂ Study -- Methodology and Protocols, 1963 (RESTRICTED, PHI)
26	MyO ₂ Study -- Negative Results, 1963, 1965 (RESTRICTED, PHI)
27	MyO ₂ Study -- Patient Charts, 1963 (RESTRICTED, PHI)
28	Nicotine, 1934-1938
29	Nicotinic Acid, 1937, 1940
30	Nitrites, 1934-1937

- 31 Nitroglycerin Cigarettes, 1959-1960 (RESTRICTED, PHI)
32 Organic Acid -- Fumarates, 1941
33 Organic Acid -- Fumarates (notes and research), 1940-1942
34 Organic Acid -- Hydroxyacetic Acid, 1942-1945
35 Organic Acid -- Itaconic Acid, 1945-1946
36 Oxalates, 1936
37 Pain -- Relief of, and Manuscript, "On Pain in Scientific Experiments,"
1952
38 Papaverine, 1948
39 Parathyroid -- Calcium, 1944
40 Parathyroid -- Parathormone Study, Effects on Dogs, 1926
41 Penicillin, 1943-1949
42 Pharmacology (incl. double blind study cartoon), 1955-1962
43 Pharmacology -- Articles Re: Harry Gold Lectures, Research, etc., 1947,
n.d.
44 Pharmacology -- Comments/Reviews of Harry Gold's Work and
Publications, 1935-1963
45 Pharmacology -- Topics for Future Publication -- Collected Studies on
Human Pharmacology from the Department of Pharmacology, CUMC,
1959-1960
46 Pharmacology -- Views on Pharmacology Teaching, 1931-1941
47 Phrenic Potentials, 1924-1936
48 Physostigmine, 1925, 1935
49 Pilocarpine, 1936
50 Placebo -- Articles in Magazines Re: Placebos (incl. mention of Dr.
Gold's research), 1959-1964
51 Poisoning Cases, 1932-1951
52 Posterior Pituitary Gland, 1935
53 Potassium Chloride Poisoning, 1933-1935
54 Psychosomatic Effect on Cardiac Pain, 1942
55 Pulmonary and Myocardial Disease Study, n.d.
56 Pyrdone, 1947-1949
57 Queen Bee Jelly (materials used for court trial), 1956-1960
58 Race Horse Drugs -- Tom Smith Case, 1945-1946
59 Reflections -- Miscellaneous Medical Thoughts of Dr. Gold, 1952-1959
60 Refrigerant Toxicity, 1936-1937
61 Resins -- Cation Exchange Resin, 1948-1950
62 Rheumatic Heart Disease (and angina pectoris), 1930
63 Rheumatic Heart Disease, 1943-1948
64 Rhythm Disorders and the Effects of Drugs, 1950, 1966
65 Salt and Low Sodium Diet Menus, 1944, 1948
66 Salt-Free Diet -- Cartoon, n.d.
67 Sex Hormones and Coronary Disease, 1942-1947
68 Shock Acapnia (incl. lecture at Newark, March 30), n.d.
69 Sodium Nitroprusside (Sodium Nitroferricyanide), 1945-1946
70 Sodium Thiocyanate, 1948-1952

71	Strychnine (Barbital-Strychnine), 1933
72	Strychnine Absorption, 1933
73	Succinic Acid, n.d.

Box 18: Series IX, General Research, 1922-1969

Folder:	Description:
1	Sulfonamides, 1941-1950
2	Syphilis, 1936-1950
3	Syphilis and Heart Disease, 1933-1936
4	Theobromine and Aminophylline, 1939-1940
5	Theophylline, 1936, 1945
6	Thioglycollate, 1948
7	Thiomerin, 1950-1951
8	Thyroid Disease, 1933-1950, n.d.
9	Toxicology and Toxicological Analysis, 1939-1946
10	Tropical Medicine -- Lecture Announcements, 1944, n.d.
11	Veratrum Alkaloids -- Treatment for Hypertension, 1950-1953
12	Vitamins (miscellaneous), 1940-1949
13	Yeast -- Classification as a Drug Re: Court Case and Dr. Gold's Testimony, 1934-1935
14	Zaroxolyn -- Protocol for Intravenous and Oral Drug Administration, 1968-1969
15	Zaroxolyn -- Stetson, Dr. John of Pennwalt -- Correspondence, 1969
16	Miscellaneous -- List of Slides, n.d. (RESTRICTED, PHI)
17	Miscellaneous -- Research Projects (Dr. Gold's and others), 1934-1964

Box 18: Series X, Reprints, 1923-1970

Folder:	Description:
18	Gold Reprints, 1923-1929
19	Gold Reprints, 1930-1933
20	Gold Reprints, 1934-1935
21	Gold Reprints ("Facilities in New York City for the Care of Patients with Heart Diseases"), 1936
22	Gold Reprints, 1937-1939
23	Gold Reprints, 1940-1941
24	Gold Reprints, 1942-1943
25	Gold Reprints, 1944-1945
26	Gold Reprints, 1946-1947
27	Gold Reprints, 1948-1949
28	Gold Reprints, 1950-1952
29	Gold Reprints, 1953-1959
30	Gold Reprints, 1960-1962
31	Gold Reprints, 1963-1970
32	Gold Paper Drafts, n.d.

33 Inventory of Reprints, n.d.

Box 18: Series XI, Personal/Biographical Files, 1942-1966

Folder:	Description:
34	Health (major illnesses and operations/life history), Vaccinations, Passports, Family Finances, 1957-1959, n.d.
35	Household Memos, 1961-1966, n.d.
36	World War II Personal Classification, 1942-1943

Box 18: Series XII, Photographs and Illustrations, 1949-1960

Folder:	Description:
37	Miscellaneous Photographs, Illustrations (Clara Sippell (sp.?), University of Concepcion Medical School, medical illustration), 1949, 1960, n.d.

Boxes 19-21: Unprocessed (RESTRICTED)
