Finding Aid To

THE HARRY GOLD, MD (1899-1972) PAPERS

Dates of Papers:  
1922-1972

231.5 Linear Inches  
(21 Boxes)

Finding Aid Prepared By:  
Rachel Moskowitz, February 2012;  
Updated by Nicole Milano in November 2020
PROVENANCE:

The Harry Gold, MD Papers were donated by the family of Harry Gold, MD to the Medical Center Archives in 1973.

ADMINISTRATIVE/BIOGRAPHICAL NOTE:

Harry Gold was born in Russia on December 25, 1899 and immigrated to the United States as an infant. While studying at Cornell University in Ithaca, New York he was elected to Phi Beta Kappa, and, in 1919, graduated with a bachelor of arts. Three years later, Dr. Gold earned his medical degree from Cornell University Medical College (now Weill Cornell Medical College).

Immediately following graduation, the Medical College hired Dr. Gold as an instructor in pharmacology, a position he retained until his promotion in 1929 to assistant professor. In 1944 he became associate professor of pharmacology and, three years later, earned the title of full professor. Dr. Gold served in this capacity until his retirement in 1965, whereby he received the distinction of professor emeritus. From 1930 through 1935, Dr. Gold taught graduate courses in medicine at Rutgers University and from 1945 through the early 1950s lectured at Seton Hall University on topics which included therapeutics, cardiology, electrocardiology and cardiac fluoroscopy.

In addition to an academic career that spanned over forty years, Dr. Gold also served as a physician and medical consultant for several hospitals in New York and elsewhere. From 1922 to 1931 he worked as an assistant physician at Bellevue Hospital and from 1931 through the mid-1960s as an attending physician at Beth Israel Hospital and the Hospital for Joint Diseases where he conducted much of his research in their cardiac clinics. Dr. Gold served as the attending-in-charge of the Cardiovascular Research Unit at Beth Israel and the chairman of the Medical Advisory Board at the Hospital for Joint Diseases. In the mid-1960s he transitioned from staff physician to consultant at both hospitals. From 1942 through 1967, Dr. Gold also served as a physician to out-patients at New York Hospital. Dr. Gold tendered his services at a number of other institutions, including Saint Vincent’s, Sea View, Richmond Memorial and Doctors Hospitals, as well as Saint Francis Sanatorium for Rheumatic Children, the New York Cardiac Center, and a number of others.

As a pharmacologist and cardiologist, Dr. Gold helped pioneer the standardization of digitalis compounds for the treatment of heart disease. His work focused on diuretics and anti-hypertensive medication and relied heavily on the use of placebos when evaluating the efficacy of various drugs. Dr. Gold was among the first to promote the double-blind test wherein neither the researcher nor the patient knows which medication (or placebo) each individual in the study is receiving. Only after the study concludes is the information revealed.

Along with his faculty and staff appointments, Dr. Gold was a fellow of the New York Academy of Medicine, the American Medical Association, the New York Academy of Sciences and the American Association for the Advancement of Science. He also served as a director of the New
York Heart Association and a member of numerous professional organizations including, among others, the American Society for Pharmacology and Experimental Therapeutics, the Revision Committee for the U.S. Pharmacopoeia, and the American Heart Association.

Dr. Gold was married to Bertha Gold, emeritus professor of physiology at Hunter College. They raised three children, Stanley, Muriel and Naomi.

Dr. Gold died of a stroke on April 21, 1972 at the age of 72 at his home in New York City.

Bibliography:

SCOPE AND CONTENT NOTE:

The Harry Gold Papers span from 1922 to 1972 and comprise the personal and professional papers of Dr. Harry Gold, a former faculty member of Cornell University Medical College and physician at New York Hospital. Dr. Gold’s papers follow his rise from instructor of pharmacology to professor emeritus and from assistant physician to attending-in-charge. His correspondence, research notes and hospital documentation shed light on the medical practice, policy, and theory of the first half of the 20th century, and, at the same time, chart his own success as both an educator and investigator.

The Harry Gold Papers is divided into twelve series: Correspondence (1928-1972); Speaking Engagements (1931-1966); Cornell University Medical College/New York Hospital (1936-1966); Hospital for Joint Diseases (1929-1966); Beth Israel Hospital (1931-1970); Additional Hospital and Institutional Affiliations (1933-1972); State and National Committee/Professional Organization Participation (1928-1969); Digitalis Research (1922-1965); General Research (1922-1969); Reprints (1923-1970); Personal/Biographical Files (1942-1966); Photographs and Illustrations (1949-1960).

Series I: Correspondence, 1928-1972 (Boxes 1-6)

Series I contains personal and professional correspondence written by and addressed to Dr. Harry Gold. The series is divided into four sub-series. The first sub-series consists of Dr. Gold’s general correspondence and includes items of both personal and professional interest dating from 1928 through 1972. Letters to and from hospital and university colleagues, as well as medical consultants, pharmaceutical manufacturers, and local and national organizations to which Dr. Gold belonged make up the bulk of the first sub-series. These files deal primarily with Dr. Gold’s research activities and highlight his involvement in the medical community. Along with his professional correspondence, letters and conversations of a more personal nature are also found within the first sub-series, and include those between Dr. Gold and family.
members and friends. These address births and deaths, weddings, religious events and social activities. Such conversations are often found alongside more professional matters; many of Dr. Gold’s colleagues became close friends. This sub-series is arranged in alphabetical order by correspondent. Unsorted correspondence files are arranged at the end of the sub-series.

The second sub-series, spanning from 1932 through 1969, consists of correspondence files between Dr. Gold and the individual physicians and researchers employed in the cardiology labs at both Beth Israel Hospital and the Hospital for Joint Diseases. These files document the digitalis and diuretics studies conducted at both institutions and the way in which Dr. Gold operated each of his laboratories and clinics. The correspondence within this sub-series also serves as an inventory of those who contributed to Dr. Gold’s work by staffing his cardiology clinics. This sub-series is arranged alphabetically by correspondent.

The third sub-series spans from 1942 to 1965 and is comprised of letters of recommendations written by Dr. Gold on behalf of his students, assistants and colleagues for college and graduate school admissions, academic positions, and professional organization memberships. Because of the sensitive nature of the documents, the entire sub-series is restricted. Like the two preceding sub-series, the files are arranged in alphabetical order.

The fourth sub-series spans from 1942 to 1967 and is made up of correspondence between Dr. Gold and the editors of various medical publications. The majority of the files document Dr. Gold’s conversations with the editors of the “Progress” Section of the American Journal of the Medical Sciences (he too served as an editor). This sub-series also includes two folders of correspondence regarding the publication “The Intern” and Dr. Gold’s participation as an editorial board member. The sub-series is arranged chronologically by publication.

Series II: Speaking Engagements, 1931-1966 (Boxes 7-8)

Files documenting Dr. Gold’s lectures and speaking engagements comprise the second series of the collection. This series is divided into two sub-series. The first sub-series contains lecture invitations Dr. Gold received from university and hospital administrators, professional organizations, and medical students to address both academic and non-academic audiences, participate in conferences, and lead workshops. Within the folders are correspondence files, typed lectures, research notes, reprints and articles, and event planning materials. The sub-series spans from 1931 through 1966 and indicates not only the frequency of Dr. Gold’s travels, but the popularity of his research among both the medical and the lay community.

Spanning from 1945 to 1951, the second sub-series within Series II contains the lecture transcripts of post-graduate courses Dr. Gold offered at Seton Hall University and at its medical center in Newark, New Jersey. The drafts and final copies of Dr. Gold’s lectures found within this sub-series document what was then known of various ailments and conditions and illustrate the medical practices used to treat them.

Both sub-series are arranged chronologically.

Series III: Cornell University Medical College/New York Hospital, 1936-1966 (Box 9)
Series III consists of Dr. Gold’s files pertaining to his tenure at Cornell University Medical College and New York Hospital. As both a Cornell University and Cornell University Medical College alumnus and an employee of the institution, the Cornell files in this series reflect both roles. The bulk of the series, though, emphasizes Dr. Gold’s professional career and the complementary work in which he engaged between both the Medical College and New York Hospital. Files within this series include college and hospital department and committee notes, lecture and conference announcements, annual progress reports, membership cards and staff appointment forms, institutional publications, donation correspondence, NIH grant-funded research materials, and an index of Dr. Gold’s assistants, among other files.

The series is arranged alphabetically by subject.

**Series IV: Hospital for Joint Diseases, 1929-1966 (Box 9)**

Dr. Gold joined the staff of the Hospital for Joint Diseases in 1931 and remained an employee for over three decades. This series consists of the materials he accumulated while an HJD physician. The bulk of the files document Dr. Gold’s administration of the hospital’s cardiac clinic, the cardiology conferences sponsored by the hospital, and the Medical Advisory Board he chaired.

The files are arranged alphabetically by subject.

**Series V: Beth Israel Hospital, 1931-1970 (Box 10)**

At the same time as Dr. Gold joined the staff of the Hospital for Joint Diseases in 1931, he did so at Beth Israel Hospital as well. The majority of his files reflect his role as the attending-in-charge of the hospital’s Cardiovascular Research Unit. Among the files are cardiac clinic and research unit staff lists, departmental and administrative correspondence, annual reports and cardiology conference materials. Donation and grant files, medical staff directories and medical board committee notes are also included.

The series is arranged alphabetically by subject.

**Series VI: Additional Hospital and Institutional Affiliations, 1933-1972 (Box 11)**

In addition to his primary work at New York Hospital, Beth Israel and the Hospital for Joint Diseases, Dr. Gold held staff positions and consultancies at a variety of other hospitals and institutions. This series contains correspondence files, appointment records, and assorted materials documenting Dr. Gold’s work at and recommendations for these various institutions.

The series is arranged alphabetically by hospital and institution.

**Series VII: State and National Committee/Professional Organization Participation, 1928-1969 (Box 12)**
This series reveals Dr. Gold’s contributions as a member of local and national medical committees and professional organizations. Dr. Gold sat on the editorial boards and advisory committees of several organizations, including the American Academy of General Practice, the Medical Society of the State of New York and the New York State Journal of Medicine.

This series is arranged alphabetically by organization.

**Series VIII: Digitalis Research, 1922-1965 (Boxes 12-14)**

During his tenure as a pharmacologist and cardiologist, Dr. Gold helped pioneer the field of digitalis studies. His research on digitalis and its compounds contributed to a more thorough understanding of the cardiac glycosides, of their benefits and their risks, and ultimately paved the way for better defined standards of production and use.

The series is divided into three sub-series. The first, which spans from 1924-1960, consists of correspondence dealing with Dr. Gold’s digitalis research. Topics covered include bio-assay preparation, research collaboration with the New York Heart Association, and study findings. The sub-series is arranged alphabetically by correspondence topic.

The second subseries covers Dr. Gold’s work from 1922 to 1960 and consists of research notes and bio-assay results. It includes correspondence files between Dr. Gold and the various laboratories and pharmaceutical companies with which he collaborated on digitalis studies and who provided him the tinctures and preparations used in his bioassays on humans, cats, frogs and pigeons. The sub-series also includes comparisons of digitalis alternatives for the treatment of heart disease, such as the use of convallaria and strophanthin and the results of Dr. Gold’s numerous studies on cardiac glycosides. Drafts of digitalis manuscripts are also found within the sub-series. The sub-series is arranged alphabetically by subject.

Dr. Gold’s comparisons of specific digitalis compounds such as digifolin, digilanid and digitoxin comprise the third and final sub-series of Series VIII. Correspondence, research notes and bio-assay results from 1926 through 1965 highlight Dr. Gold’s extensive studies. Manuscripts and papers documenting his lab work are also included. The sub-series is arranged alphabetically by digitalis compound.

**Series IX: General Research, 1922-1969 (Boxes 14-18)**

Documenting nearly half a century of medical practice, Dr. Gold’s general research files address well over one hundred subjects, with emphasis placed on barbiturate, cinchona alkaloid and diuretics studies, heart conditions and heart disease, and the development of experimental drugs. As an expert in the field of human pharmacology, Dr. Gold examined numerous medications, including both those with FDA approval as well as those still in trial phase to better determine their use and their effectiveness. Dr. Gold’s general research files record these studies and help shed light on 20th century medical practice. The files within this series consist of Dr. Gold’s handwritten and typed notes, as well as journal articles, newspaper clippings, brochures and advertisements for new medications, and academic papers.
The series is arranged alphabetically by subject.

**Series X: Reprints, 1923-1970 (Box 18)**

This series contains reprints of Dr. Gold’s articles arranged in chronological order. Also included within the series are drafts of some of Dr. Gold’s papers as well as an inventory of reprints compiled during an earlier processing of the collection.

**Series XI: Personal/Biographical Files, 1942-1966 (Box 18)**

This series, arranged alphabetically, consists of three folders of personal and biographical files relating to Dr. Gold. The files include Dr. Gold’s health reports, vaccination records, passports, family finances, household memos, and World War II classification records.

**Series XII: Photographs and Illustration, 1949-1960 (Box 18)**

This series contains two photographs and one illustration found loose within Dr. Gold’s collection. The label on one of the photographs, a portrait of a woman, suggests the subject’s name was Clara Sippell, though the spelling is difficult to decipher. The other photograph offers an exterior view of the University of Concepcion Medical School in Chile. A medical illustration on cardboard stock is also included.

**PROCESSING NOTE:**

The collection was processed by Rachel Moskowitz in February 2012. According to the box notations, the collection had also been partially processed in the early 1990s. Care has been taken to preserve what likely reflected Dr. Gold’s original series arrangement.

Original folder titles have been preserved when such existed and accurately reflected the contents of the folders. Materials in binders, envelopes, and loose have been foldered and new titles have been given to these materials.

Unprocessed boxes 19-21 and information regarding the provenance of the collection were added in 2020.

**ACCESS RESTRICTIONS:**

This collection is open to researchers, with the exception of boxes 19-21, which are unprocessed and require review by Archives staff prior to access by researchers.

Folders with confidential patient health information, student records, and other personally identifiable information are restricted due to HIPAA, FERPA, and additional PHI regulations. Individual folders are marked “RESTRICTED” if they are known to contain restricted materials.
If the researcher chances upon an unrestricted folder that contains patient or student records, the researcher is asked to discontinue use of the documents immediately and notify the archivist.

**PREFERRED CITATION:**

Identification of document; Date (if known); Harry Gold, MD (1899-1972) Papers; Box and Folder Numbers; Medical Center Archives of NewYork-Presbyterian/Weill Cornell.

**ACCESS POINTS:**

Cornell University -- Joan and Sanford I. Weill Medical College.
Cornell University -- Medical College.
New York Hospital.
NewYork-Presbyterian Hospital.
Cardiac glycosides.
Cardiology.
Cardiology -- Research.
Clinical pharmacology.
Digitalis (Drug).
Digitalis glycosides.
Diuretics, Mercurial.
Drugs -- Development.
Drugs -- Dose response relationship.
Heart disease.
Medical education -- United States.
Pharmacology.
Placebos (Medicine).
Toxicology.
Articles.
Correspondence.
Photographs.
Reprints.

**RELATED MATERIAL:**

There are no additional collections directly related to Harry Gold. For additional information on diuretics, digitalis, the double-blind study and Dr. Gold’s research at New York Hospital and Cornell University Medical Center, please contact the Medical Center Archives.

83 “The Interne” -- Correspondence as Editorial Board Member, 1945-1946
84 “The Interne” -- Correspondence with Editors, 1946-1949

Box 7: Series II, Speaking Engagements, 1931-1966
Folder: Description:
1. Various lectures given in cooperation with Rutgers University, 1931-1941
2. “Recent Advances in Pharmacology,” Mt. Holly, 1933
6. Electrocardiography Lectures at the Hospital for Joint Diseases, 1934-1938
7. New York Medical Society Education Committee Lectures, 1937-1939
9. “Concerning Therapeutics,” Council on Pharmacy of Queens County Medical Society, 1938
10. “Drug Therapy in Coronary Disease,” Academy of Medicine, 1938
11. “Mechanism of Cardiac Slowling by Digitalis in Patients with Auricular Fibrillation,” Pharmacology Society and “Physiological Adaptations in Cardiac Slowling by Digitalis and their Bearing on Problems of Digitalization in Patients with Auricular Fibrillation,” 1938, 1939
13. “Recent Developments in Newer Drug Therapy,” Sussex County Medical Society, 1939
14. “Digitalis in Heart Failure,” Conference on Therapy, American Medical Association, 1940
15. Radio Lectures, “Heart Disease Among Children,” “Facilities for the Care of Patients with Rheumatic Heart Disease,” “Care of Children with Rheumatic Fever,” “Answers to Three Questions” and Related Materials, 1935-1941
16. Talk on Digitalis, North Bronx Medical Society (also given at Flower Hospital), 1941
17. Talk on Recent Advances, Newton, New Jersey, 1941
18. “Dosages of and Toxic Reactions to Drugs,” American College of Physicians, 1941
19. “Control of Gastrointestinal Function by Drugs Acting Peripherally,” Cleveland Meeting of the American Medical Association, 1941
20. “A Common Sense Materia Medica in the Hospital,” American Hospital Association, 1941-1942
“Evaluation of Drug Therapy in Heart Disease,” Kings County Medical Society, 1941

“Electrocardiography,” Josiah Macy, Jr. Foundation, 1941-1942

“The Action of Drugs on the Gastrointestinal Tract,” National Gastroenterological Association, 1941-1942

“Autonomic Nervous System,” Class Lecture for the Department of Physiology, 1942

“Some Recent Advances in Therapeutics, Including the Newer Drugs of the Sulfanamide Group,” New York Academy of Medicine, 1942 (materials reused in 1944)

“Pain – The Action and Uses of Analgesics,” Association for Research in Nervous and Mental Disease, 1942

“Digitalis,” New York Heart Association, 1944

“Recent Advances in the Treatment of Heart Diseases,” Radio Broadcast Recording on Program “Health on the March,” 1944

“Assay of Digitalis Preparations,” American Pharmaceutical Manufacturers Association, 1944

“The Clinical Importance and Uses of the Sympathomimetic Agents,” American Chemical Society, 1944

Fourth Year Course – Pathological Physiology, 1945

“Pharmacologic Basis of Cardiac Therapy,” New York Academy of Medicine, 1945

“Pharmacologic Basis of Cardiac Therapy,” Draft of Lecture, 1945

“Sedatives and Stimulants in Pediatric Practice,” Section of Pediatrics, New York Academy of Medicine, 1945-1946

List of Slides, “Drug Comparison in Man,” Queens, 1946

“Stimulants in Pediatrics,” American Academy of Pediatrics, 1946

“Digitalis,” American Medical Association, 1946

American-Hungarian Medical Association Lecture, 1947

“Recent Advances in Therapeutics,” New York Academy of Medicine, 1947

“Mechanism of Action of Digitalis and the Choice of a Digitalis Preparation,” Binghamton Academy of Medicine, 1947

“The Pharmacologic Basis of Cardiac Therapy,” Emory University School of Medicine Phi Delta Epsilon Medical Fraternity, 1947

“Cardiac Therapy,” Tufts College Medical School Alpha Omega Alpha Medical Society, 1947 and “Cardiac Glycosides and the Treatment of Congestive Failure,” Boston City Hospital House Officers’ Association, 1947

“The Management of the Failing Heart,” Geneva (NY) Academy of Medicine, 1947

Columbia University College of Physicians and Surgeons Talk, 1947

“The Treatment of Heart Failure,” Medical Society of the County of Schenectady, 1947

“The Management of the Failing Heart,” New York University College of Medicine Phi Delta Epsilon, 1947
“The Digitalis Glycosides,” Medical Society of the County of Kings, 1947
“Digitalis,” Second (Cornell) Medical Division Bellevue Hospital, 1947
“Action of the Sympatholytic Drugs,” American Congress of Physical Medicine, 1947
“Myocardial Infarction,” Beth Israel and New York University Postgraduate Course in Internal Medicine, 1947
“Assay of Digitalis Preparations,” Rutgers College of Pharmacy and American Pharmaceutical Association, 1947
“The Use of Drugs in the Treatment of Heart Disease,” Louisiana State Medical Society, 1946-1947
“Management of the Failing Heart,” Phi Lambda Kappa Annual Lecture, 1947
“The Use of Drugs in Heart Disease,” American Heart Association and American Medical Association, 1947
“BAL Therapy in Arsenic and Mercury Poisoning,” American Medical Association, 1947
“Modern Management of the Failing Heart,” Lilly Research Laboratories, 1947
“Management of the Failing Heart,” Southampton Hospital Symposium on Cardiovascular Diseases, 1947
“Management of the Failing Heart,” Michigan State Medical Society, 1947
“Recent Concepts of the Action of Digitalis,” University of Maryland School of Medicine, 1947
“Digitalis,” Second (Cornell) Medical Division, Bellevue Hospital, 1947
“Management of the Failing Heart,” Medical Society of the State of New York, 1947
“A System for the Treatment of Congestive Failure,” Passaic County Medical Society, 1947
“Rational Use of Cardiac Agents in Connection with Surgical Problems,” Sloan Kettering Institute for Cancer Research Medical Rounds, 1947
“Choice of a Digitalis Preparation,” Richmond County Medical Society, 1947
“Recent Advances in the Management of the Failing Heart,” New York Academy of Medicine, 1947-1948
“Treatment of Congestive Failure,” Long Beach Clinical Society, 1947-1948
“Recent Advances in the Use of Cardiovascular Drugs,” Medical Society of the District of Columbia, 1948
“Newer Trends in the Management of Congestive Failure,” Duke University School of Medicine, 1948
“Sympathetic Amines,” Speech Written for Radio Show “We the People,” September 28, 1948
“Management of the Failing Heart,” Academy of Medicine of Cincinnati, 1948-1949
“The Pharmacologic Aspects of Treatment,” U.S. Naval Hospital at St. Albans, 1949

“Management of the Failing Heart,” Niagara Falls Clinic Day, 1948-1949

“Clinical Pharmacology of Cardiac Drugs,” New York Academy of Medicine, March 25, 1949

“Congestive Failure,” American College of Physicians, 1949

Slides for Lilly Research Laboratory Talk, 1949

“An Optimal Routine for the Management of Congestive Failure,” American Heart Association, 1949

“Some Observations on Digitoxin and Other Glycosides of the Digitalis Series,” American Medical Association, 1949

“Recent Developments in Cardiac Drugs,” West Virginia State Medical Association, 1949

“Treatment of Some Disorders of Cardiac Rhythm,” Connecticut State Medical Society Annual Meeting, 1950

Cardiac Management, University of North Carolina School of Medicine, Oct 1951

“Recent Advances in Therapy, Other than ACTH,” 34th Annual Session, American College of Physicians, 1953

“Cardiac Drugs and the Aging Problem,” Columbia University College of Pharmacy Bicentennial Conference, 1954

“Recent Developments in Diuretic Therapy,” Medical Society of the State of Pennsylvania, Symposium on New Drugs, 1954

Atlantic City Hospital Visiting Chief Lecture Series, 1956 Season, 1955-1956

“Experiences in Human Pharmacology,” Symposium on Quantitative Methods in Human Pharmacology and Therapeutics, 1957-1958

“Human Pharmacology,” Michigan State Medical Society, 1958

“Human Pharmacology in Relation to Drug Therapy in Heart Disease,” Durham-Orange County Heart Association, 1958-1959

“Diuretics, Uses and Abuses,” Health Association of Rochester and Monroe County Heart Committee, 1958-1959

“Human Pharmacology in Relation to Drugs Used in Congestive Failure,” New Hampshire Heart Association, 1958-1959

National Conference on the Legal Environment of Medical Science, 1959

“Cardiac Emergencies,” Glens Falls Academy of Medicine, 1959

“A Rapid Method for the Quantitative Evaluation of Diuretic Agents in Bed-Patients with Congestive Failure,” Federation Meeting Atlantic City, 1959

“The Use of Aldosterone Antagonists in Congestive Heart Failure,” Searle and Co. Conference on the Clinical Use of Aldosterone Antagonists, 1959

“Relative Diuretic Efficacy of Diuril and Mercuhydrin in Congestive Failure” and “Relation Between Amount of Edema and Response to a Diuretic by Patients in Congestive Failure,” American Society for Pharmacology and Experimental Therapeutics, 1959

“Planning Clinical Trials,” American Statistical Association and the Biometric Society, 1959-1960

“A New Approach to the Treatment of Cardiac and Hepatic Edema by Steroids,” Rhode Island Medical Society, 1959-1960

Box 8: Series II, Speaking Engagements, 1931-1966

Sub-Series 1: Lecture Invitations and Notes, 1931-1966

Folder: Description:
2 Atlantic City Hospital Visiting Chief Lecture Series, Spring 1960
6 “Modifications of the Method for the Quantitative Comparison of Diuretic Agents in Bed-Patients with Congestive Failure,” Pharmacological Society Meeting, 1960
7 “Adrenal Cortical Steroids as Diuretics in Patients with Edema of Hepatic and Cardiac Origin,” Chicago, 1960
8 “A Method of Determining the Ratio of Cardiac to Emetic Activity of Digitalis Materials in Patients with Heart Disease,” Chicago, 1960
9 “Drugs in Heart Disease,” Seton Hall College of Medicine and Dentistry, 1960
