**TITLE:**

Harry Gold, MD Papers

---

**ABSTRACT:**

Dr. Harry Gold was a professor of pharmacology at Cornell University Medical College from 1947 to 1965 and a physician at New York Hospital from 1942 through 1967. The Harry Gold, MD Papers comprise his personal and professional papers, including correspondence, research notes, publications, biographical documents, lecture notes, and material from legal proceedings.

---

**CREATOR:**

Gold, Harry

---

**PROVENANCE:**

The Harry Gold, MD Papers were donated to the Medical Center Archives at New York-Presbyterian/Weill Cornell Medicine in 1973 by his three children: Naomi Gold Steinberger, Muriel Gold Morris, and Stanley Gold. An accrual of three boxes related to Dr. Harry Gold, MD were donated to the Medical Center Archives at an unknown date by an unknown source.

---

**ADMINISTRATIVE/BIOGRAPHICAL NOTE:**

Harry Gold was born in Russia on December 25, 1899 and immigrated to the United States as an infant. While studying at Cornell University in Ithaca, New York he was elected to Phi Beta Kappa, and, in 1919, graduated with a bachelor of arts. Three years later in 1922, Dr. Gold earned his medical degree from Cornell University Medical College (now Weill Cornell Medical College).

Immediately following graduation, Cornell University Medical College hired Dr. Gold as an instructor in pharmacology, a position he retained until his promotion in 1929 to assistant professor. In 1944 he became associate professor of pharmacology and, three years later, earned the title of full professor. Dr. Gold served in this capacity until his retirement in 1965, whereby he received the distinction of professor emeritus. From 1930 through 1935, Dr. Gold taught

graduate courses in medicine at Rutgers University and from 1945 through the early 1950s lectured at Seton Hall University on topics which included therapeutics, cardiology, electrocardiology, and cardiac fluoroscopy.

In addition to an academic career that spanned over forty years, Dr. Gold also served as a physician and medical consultant for several hospitals in New York and elsewhere. From 1922 to 1931 he worked as an assistant physician at Bellevue Hospital and from 1931 through the mid-1960s as an attending physician at Beth Israel Hospital and the Hospital for Joint Diseases where he conducted much of his research in their cardiac clinics. Dr. Gold served as the attending-in-charge of the Cardiovascular Research Unit at Beth Israel and the chairman of the Medical Advisory Board at the Hospital for Joint Diseases. In the mid-1960s he transitioned from staff physician to consultant at both hospitals. From 1942 through 1967, Dr. Gold also served as a physician to out-patients at New York Hospital. Dr. Gold tendered his services at a number of other institutions, including Saint Vincent's, Sea View, Richmond Memorial and Doctors Hospitals, as well as Saint Francis Sanatorium for Rheumatic Children, the New York Cardiac Center, and a number of others.

As a pharmacologist and cardiologist, Dr. Gold helped pioneer the standardization of digitalis compounds for the treatment of heart disease. His work focused on diuretics and anti-hypertensive medication and relied heavily on the use of placebos when evaluating the efficacy of various drugs. Dr. Gold was among the first to promote the double-blind test wherein neither the researcher nor the patient knows which medication (or placebo) each individual in the study is receiving. Only after the study concludes is the information revealed.

Along with his faculty and staff appointments, Dr. Gold was a fellow of the New York Academy of Medicine, the American Medical Association, the New York Academy of Sciences and the American Association for the Advancement of Science. He also served as a director of the New York Heart Association and a member of numerous professional organizations including, among others, the American Society for Pharmacology and Experimental Therapeutics, the Revision Committee for the U.S. Pharmacopoeia, and the American Heart Association.

He was married to Bertha Gold, Emeritus Professor of Physiology at Hunter College. They raised three children, Stanley, Muriel, and Naomi. Gold died of a stroke on April 21, 1972 at the age of 72 at his home in New York City.

“Harry Gold, a Heart Specialist and Digitalis Pioneer, is Dead.” *New York Times*, April 22, 1972.

---

## **SCOPE AND CONTENT NOTE:**

The Harry Gold, MD Papers span from 1910 to 1972 and comprise the personal and professional papers of Gold, a former faculty member of Cornell University Medical College and physician at New York Hospital. It contains his correspondence, research notes, publications, biographical documents, lecture notes, and legal material.

A significant topic represented is Gold's research studies and publications, particularly on Digitalis. The papers also document Gold's personal and professional correspondence with colleagues, patients, and family members. Subjects of the correspondence include patient diagnoses, research findings, and invitations to social events. Gold's testimony in several legal proceedings as an expert witness of medical issues, including *U. S. (Food and Drug Administration) v the Ames Company, Inc. (Decholin)*, signify his standing as an authority in the medical community. The papers contain biographical and personal information about Gold, including his certificate of Naturalization, his United States Army Enlistment Record, and his medical and financial history. The papers also contain Gold's lecture notes. There is significant documentation of the Harry Gold Research Fund for Human Pharmacology, Inc., an organization founded by Gold in 1959 to fund his experimental studies in the testing of drugs on human participants in order to better determine a drug's use and effectiveness.

Beyond these textual materials, other formats within the papers include a disposable silver/silver chloride electrode kit and an envelope of polaroid photographs of Gold and his wife, Bertha Gold. The papers also contain a folder of two photographs and one illustration found loose within Gold's collection.

See individual series and subseries description for more information.

---

## **ARRANGEMENT:**

The Harry Gold, MD Papers are divided into fourteen series: Series 1: Correspondence, 1928-1972; Series 2: Speaking Engagements, 1931-1966; Series 3: Cornell University Medical College/New York Hospital, 1936-1966; Series 4: Hospital for Joint Diseases, 1929-1966; Series 5: Beth Israel Hospital, 1931-1970; Series 6: Additional Hospital and Institutional Affiliations, 1933-1972; Series 7: State and National Committee/Professional Organization Participation, 1928-1969; Series 8: Digitalis Research, 1922-1965; Series 9: General Research, 1922-1971; Series 10: Reprints, 1923-1970; Series 11: Personal/Biographical Files, 1910-1967; Series 12: Photographs and Illustrations, 1949-1960; Series 13: Accrual: Harry Gold Research Fund for Human Pharmacology, Inc. Records, 1949-1971; and Series 14: Accrual: Legal Material, 1953-1964.

See individual series and subseries description for more information about the arrangement of the materials.

---

## **CONDITIONS GOVERNING ACCESS:**

Historical records in the Medical Center Archives are protected by HIPAA (Health Insurance Portability and Accountability Act of 1996), internal policies requiring protection and confidential handling of PHI (protected health information), FERPA (Family Educational Rights and Privacy Act), or other institutional policies regarding internal or confidential records, and may require additional permissions prior to access. View the Contents List for more information and visit the Medical Center Archives website for the most updated policies and procedures regarding access to historical materials containing restrictions.

---

### **CONDITIONS GOVERNING REPRODUCTION AND USE:**

Historical records in the Medical Center Archives are protected by HIPAA (Health Insurance Portability and Accountability Act of 1996), internal policies requiring protection and confidential handling of PHI (protected health information), FERPA (Family Educational Rights and Privacy Act), institutional policies regarding internal or confidential records, and copyright laws, and may require additional permissions prior to reproductions and use. Visit the Medical Center Archives website for the most updated policies and procedures regarding reproduction and use of historical materials containing restrictions.

---

### **LANGUAGE OF MATERIAL:**

English.

---

### **PROCESSING NOTE:**

The Harry Gold, MD Papers were partially processed in the early 1990s by an unknown staff member and fully processed by Rachel Moskowitz in February 2012. Care was taken to preserve what likely reflected Gold's original series arrangement. Original folder titles were preserved when such existed and accurately reflected the contents of the folders. Materials in binders, envelopes, and loose were foldered and new titles were given to these materials.

Information regarding the unprocessed accrual and provenance of the entire collection were added to the finding aid by Nicole Milano in 2020. Alyssa Moore then processed the accrual in 2023. Where logical, the accrual was added as new subseries within the existing arrangement. Additionally, two new series were created for items from the accrual which could not be grouped into existing series. The finding aid was also updated in 2023 with the addition of an abstract, conditions governing use, and information regarding where items from the accrual were added in the related series and subseries descriptions.

### **ACCESS POINTS:**

Cornell University--Medical College.

New York Hospital.  
 NewYork-Presbyterian Hospital.  
 Cardiology--Research.  
 Cardiac glycosides.  
 Clinical pharmacology.  
 Digitalis (Drug).  
 Diuretics, Mercurial.  
 Drugs--Development.  
 Drugs -- Dose response relationship.  
 Heart disease.  
 Medical education--United States.  
 Pharmacology.  
 Placebos (Medicine).  
 Toxicology.

## **PREFERRED CITATION:**

Item Name or Identification; Box #, Folder #; Harry Gold, MD Papers, 1910-1972, bulk 1942-1972 (Medical Center Archives of NewYork-Presbyterian/Weill Cornell Medicine, New York, NY).

## **CONTENTS LIST:**

### **Series 1: Correspondence, 1928-1972**

Extent: 168 linear inches

Series 1 contains personal and professional correspondence written by and addressed to Gold. The series is divided into five subseries.

### **Subseries 1A: General, 1928-1972**

Extent: 120 linear inches

Subseries 1A consists of Gold's general correspondence and includes items of both personal and professional interest. Letters to and from hospital and university colleagues, as well as medical consultants, pharmaceutical manufacturers, and local and national organizations to which Gold belonged make up the bulk of this subseries. These files deal primarily with Gold's research activities and highlight his involvement in the medical community. Along with his professional correspondence, letters and conversations of a more personal nature are also found within subseries 1A and include those between Gold and family members and friends. These address births and deaths, weddings, religious events, and social activities. Such conversations are often found alongside more professional matters; many of Gold's colleagues became close friends. Subseries 1A is arranged in alphabetical order by correspondent. Unsorted correspondence files are arranged at the end of the subseries.

**Subseries 1B: Beth Israel/Hospital for Joint Diseases, 1932-1969**

Extent: 12 linear inches

Subseries 1B consists of correspondence files between Gold and the individual physicians and researchers employed in the Cardiac Clinics and Cardiovascular Research Unit at both Beth Israel Hospital and the Hospital for Joint Diseases. These files document the digitalis and diuretics studies conducted at both institutions and the way in which Gold operated each of his laboratories and clinics. The correspondence within this subseries also serves as an inventory of those who contributed to Gold's work by staffing his cardiology clinics. Subseries 1B is arranged alphabetically by correspondent.

### **Subseries 1D: Journals/Magazine Editors Correspondence, 1942-1967**

Extent: 6 linear inches

Subseries 1D is comprised of correspondence between Gold and the editors of various medical publications. The majority of the files document Gold's conversations with the editors of the "Progress" Section of the American Journal of the Medical Sciences (he too served as an editor). This subseries also includes two folders of correspondence regarding the publication "The Interne" and Gold's participation as an editorial board member. Subseries 1D is arranged chronologically by publication.

### **Box 5: Series 1D, Journals/Magazine Editors Correspondence, 1942-1967**

<b>Folder:</b>	<b>Description:</b>
1	Letters to Various Editors, 1959-1961

### **Subseries 1E: Accrual: Personal and Professional, 1947-1972**

Extent: 24 linear inches

Subseries 1E contains the personal and professional correspondence from the accrual to the Harry Gold, MD Papers processed in 2023. Letters to and from hospital and university colleagues, patients, medical consultants, editors of various medical publications, and local and national organizations to which Gold belonged make up the bulk of this subseries. There is also correspondence related to the Harry Gold Research Fund for Human Pharmacology, Inc. Alongside this professional correspondence are letters between Gold and his family members and friends which discuss social and familial subjects. Subseries 1E is arranged alphabetically by correspondent.

## **Series 2: Speaking Engagements, 1931-1966**

Extent: 48 linear inches

Series 2 is comprised of files documenting Gold's lectures and speaking engagements. This series is divided into three subseries.

### **Subseries 2A: Lecture Invitations and Notes, 1931-1966**

Extent: 36 linear inches

Subseries 2A contains lecture invitations Gold received from university and hospital administrators, professional organizations, and medical students to address both academic and non-academic audiences, participate in conferences, and lead workshops. Within the folders are correspondence files, typed lectures, research notes, reprints and articles, and event planning materials. Subseries 2A is arranged chronologically.

#### **Box 5: Subseries 2A, Lecture Invitations and Notes, 1931-1966**

<b>Folder:</b>	<b>Description:</b>
38	Various lectures given in cooperation with Rutgers University, 1931-1941
39	"Recent Advances in Pharmacology," Mt. Holly, 1933
40	"Peripheral Action of Drugs Affecting Respiration," Cornell Research Society Meeting, 1934
41	"Angina Pectoris – What Is It?" Newark, New Jersey, 1934
42	Dental Lectures: "Circulatory Drugs," "Caffeine, Strychnine, and Vaso-Dilators," "Sedatives, Hypnotics, Analgesics," "Methods for the Relief of Pain," 1934
43	Electrocardiography Lectures at the Hospital for Joint Diseases, 1934-1938
44	New York Medical Society Education Committee Lectures, 1937-1939
45	"Studies on the Action of Digitalis," Discussions Society, 1938
46	"Concerning Therapeutics," Council on Pharmacy of Queens County Medical Society, 1938

#### **Box 6: Subseries 2A, Lecture Invitations and Notes, 1931-1966**

<b>Folder:</b>	<b>Description:</b>

### **Subseries 2B: Newark Lecture Series, 1945-1951**

Extent: 12 linear inches

Subseries 2B contains the lecture transcripts of post-graduate courses Gold offered at Seton Hall University and at its medical center in Newark, New Jersey. Found within this subseries are the drafts and final copies of Gold’s lectures. These lectures document what was then known of various ailments and conditions and illustrate the medical practices used to treat them. Subseries 2B is arranged chronologically.

### **Subseries 2C: Accrual: Cornell Conference on Therapy Reprints, 1938-1949**

Extent: 1 linear inch

Subseries 2C consists of reprints and lecture material from the accrual to the Harry Gold, MD Papers processed in 2023. The bulk of the subseries is comprised of reprints of the Cornell Conference on Therapy, of which Gold was a frequent panelist and contributor. The subseries also contains a list of Gold’s lectures spanning 1938-1948 with their accompanying slide numbers and notes for Gold’s 1949 lecture on the Pharmacology of Placebos. Subseries 2C is arranged chronologically.

### **Series 3: Cornell University Medical College/New York Hospital, 1936-1966**

Extent: 8 linear inches

Series 3 consists of Gold’s files pertaining to his tenure at Cornell University Medical College and New York Hospital. As both a Cornell University and Cornell University Medical College alumnus and an employee of the institution, the Cornell files in this series reflect both roles. The bulk of the series, though, emphasizes Gold’s professional career and the complementary work in which he engaged between both the medical college and hospital. Files within this series include college and hospital department and committee notes, lecture and conference announcements, annual progress reports, membership cards and staff appointment forms,

institutional publications, donation correspondence, NIH grant-funded research materials, and an index of Gold's assistants, among other files. The series is arranged alphabetically by subject.

#### **Series 4: Hospital for Joint Diseases, 1929-1966**

Extent: 8 linear inches

Gold joined the staff of the Hospital for Joint Diseases (HJD) in 1931 and remained an employee for over three decades. This series consists of the materials he accumulated while an HJD physician. The bulk of the files document Gold's administration of the hospital's cardiac clinic, the cardiology conferences sponsored by the hospital, and the Medical Advisory Board he chaired. The files are arranged alphabetically by subject.

**Series 5: Beth Israel Hospital, 1931-1970**

Extent: 20 linear inches

At the same time as Gold joined the staff of the Hospital for Joint Diseases in 1931, he did so at Beth Israel Hospital as well. The majority of his files reflect his role as the attending-in-charge of the hospital's Cardiovascular Research Unit. Among the files are cardiac clinic and research unit staff lists, departmental and administrative correspondence, annual reports, and cardiology conference materials. Donation and grant files, medical staff directories and medical board committee notes are also included. The series is arranged alphabetically by subject.

### **Series 6: Additional Hospital and Institutional Affiliations, 1933-1972**

Extent: 8 linear inches

In addition to his primary work at New York Hospital, Beth Israel and the Hospital for Joint Diseases, Gold held staff positions and consultancies at a variety of other hospitals and institutions. This series contains correspondence files, appointment records, and assorted materials documenting Gold's work at and recommendations for these various institutions. The series is arranged alphabetically by hospital and institution.

### **Series 7: Committee/Professional Organizations, 1928-1969**

Extent: 5 folders

This series reveals Gold's contributions as a member of local and national medical committees and professional organizations. Gold sat on the editorial boards and advisory committees of several organizations, including the American Academy of General Practice, the Medical Society of the State of New York and the New York State Journal of Medicine. This series is arranged alphabetically by organization.

5	New York State Journal of Medicine Editorial Board, 1960-1969

### **Series 8: Digitalis Research, 1922-1965**

Extent: 44 linear inches

During his tenure as a pharmacologist and cardiologist, Gold helped pioneer the field of digitalis studies. His research on digitalis and its compounds contributed to a more thorough understanding of the cardiac glycosides, of their benefits and their risks, and ultimately paved the way for better defined standards of production and use. The series is divided into three subseries.

#### **Subseries 8A: Correspondence, 1924-1960**

Extent: 8 linear inches

Subseries 8A consists of correspondence dealing with Gold's digitalis research. Topics covered include bio-assay preparation, research collaboration with the New York Heart Association, and study findings. The subseries is arranged alphabetically by correspondence topic.

#### **Box 10: Subseries 8A, Correspondence, 1924-1960**

#### **Subseries 8B: Bio-Assays, Research, Data, 1922-1960**

Extent: 24 linear inches

Subseries 8B consists of research notes and bio-assay results. It includes correspondence files between Gold and the various laboratories and pharmaceutical companies with which he collaborated on digitalis studies and who provided him the tinctures and preparations used in his bioassays on humans, cats, frogs and pigeons. The subseries also includes comparisons of digitalis alternatives for the treatment of heart disease, such as the use of convallaria and strophanthin and the results of Gold's numerous studies on cardiac glycosides. Drafts of digitalis manuscripts are also found within the subseries. The subseries is arranged alphabetically by subject.

#### **Box 10: Subseries 8B, Bio-Assays, Research, Data, 1922-1960**

### **Subseries 8C: Digitalis Compounds, 1926-1965**

Extent: 12 linear inches

Subseries 8C comprises Gold's comparisons of specific digitalis compounds such as digifolin, digilanide, and digitoxin. Correspondence, research notes and bio-assay results highlight Gold's extensive studies. Manuscripts and papers documenting his lab work are also included. The subseries is arranged alphabetically by digitalis compound.

### **Series 9: General Research, 1922-1971**

Extent: 142 linear inches

Gold was an expert in the field of human pharmacology and examined numerous medications, including those with FDA approval as well as those still in trial phase to better determine their use and their effectiveness. Gold's general research files record these studies and shed light on 20<sup>th</sup> century medical practice. The series is divided into two subseries.

#### **Subseries 9A: Experimental Drugs Studies, 1923-1970**

Extent: 120 linear inches

Subseries 9A addresses well over one hundred subjects, with emphasis placed on barbiturate, cinchona alkaloid and diuretics studies, heart conditions and heart disease, and the development of experimental drugs. The files within this subseries consist of Gold's handwritten and typed notes, as well as journal articles, newspaper clippings, brochures and advertisements for new medications, and academic papers. Subseries 9A is arranged alphabetically by subject.

### **Subseries 9B: Accrual: Edema and Psychiatric Studies, 1923-1971**

Extent: 12 linear inches

Subseries 9B contains unpublished research study report, lab material, reprints, and correspondence related to Gold's research from the accrual to the Harry Gold, MD Papers processed in 2023. This subseries addresses a multitude of subjects. There is an emphasis placed on Gold's edema studies and psychiatric research, however this subseries also contains material related to Gold's research on colchicine in gout, Robert Anthony Hatcher, auricular fibrillation, hydrochlorothiazide, Doan's Kidney Pills, Talwin, and water fluoridation. The subseries also contains a bibliography that lists publications authored by Gold spanning 1923 to 1969, as well as a folder of compiled research calculations and equations Gold used over the course of his career. The subseries is arranged in alphabetical order by subject.

**Series 12: Photographs and Illustration, 1949-1960**

Extent: 1 folder

This series contains two photographs and one illustration found loose within Gold's collection. The label on one of the photographs, a portrait of a woman, suggests the subject's name was Clara Sippell, though the spelling is difficult to decipher. The other photograph offers an exterior view of the University of Concepcion Medical School in Chile. A medical illustration on cardboard stock is also included.

**Box 17: Series 12, Photographs and Illustration, 1949-1960**

<b>Folder:</b>	<b>Description:</b>
19	Miscellaneous Photographs, Illustrations (Clara Sippell (sp.?), University of Concepcion Medical School, medical illustration), 1949, 1960, undated

**Series 13: Accrual: Harry Gold Research Fund for Human Pharmacology, Inc. Records, 1949-1971**

Extent: 12 linear inches

Series 13 consists of material relating to the Harry Gold Research Fund for Human Pharmacology, Inc. from the accrual to the Harry Gold, MD Papers. The series contains files relating to the organization's incorporation in 1959 to its dissolution in 1971. It contains the organization's founding documents, including the Certificate of Incorporation and Charter, as well as lists of members, Annual Reports, and the Certificate of Dissolution. Series 13 is arranged alphabetically.
